

VOLUME 25—NUMBER 4

NEWARK, OHIO, FRIDAY EVENING, MARCH 14, 1942.

FIFTY-ONE DEAD AND MANY HURT IN STORM SWEEPING OVER SOUTH

Cyclone Wipes Out Town and Causes Much Property Damage Over a Wide Area in Number of States

OTHER SECTIONS SWEEPED BY GALES OF RAIN OR SNOW

Fifty Mile Gale Passes Over Illinois and Hits Chicago, Loss Estimated at \$1,000,000—Wind and Rain Storm Visits Newark Thursday Night and Slight Damage Occurs in West End.

Widespread storms of cyclonic intensity sweeping over the Middle West and the South during the past twenty-four hours cut their way through towns and cities of five states, snuffed out scores of lives, made hundreds homeless and destroyed property valued high in the millions.

At noon today fifty-one persons were reported killed and the death list was growing. Other sections of the country from the Great Lakes to the Gulf and the Eastern seaboard to the Rockies were swept to day by gales of rain and snow. The storm took its heaviest toll of life in Alabama. Tennessee and northwestern Georgia.

From Nashville and Memphis came reports of cyclones half a mile wide sweeping through five counties, tumbling over scores of houses, brushing a dozen towns and killing twenty persons.

Rome, Ga., told a similar story of the storm in northwestern Georgia during the night, placing the dead at eighteen. A cyclone 100 yards wide plowed through DeKalb county, Georgia, just east of Atlanta, cut it off from the world and five are dead. Two persons were killed in Columbus, Ga., and six in northern Alabama.

A fifty mile gale that passed over Chicago and Illinois caused damages estimated at \$1,000,000. From the storm-swept areas come meager reports of destruction indicating that the property loss will exceed by far the earlier estimates.

Many towns have been cut off from the world and in sections of four states thousands of telephone and telegraph wires are prostrated. In Newark the storm broke about 8:30 or 9 o'clock Friday night and for a time a heavy wind swept over the city. At no time, however, did it assume the proportions of a cyclone or a hurricane. The wind was strongest in West Newark, but no extensive property damage was reported in any part of the city.

At the plant of the Blair Motor Truck Company, the wind loosened a portion of the roof sheeting, but the damage was very slight.

At Cambria and Williams street, a large bill board, the property of the Rugg Bill Posting Company was blown down, carrying a portion of the fence with it.

Several sections of the fence surrounding Wehrle Park gave way before the heavy wind and was laid flat. All of the damage reported was of a minor character and will mean little loss.

Louisville, March 14.—Thirty-three persons are reported to have been killed and property valued at several hundred thousand dollars destroyed by a wind and rainstorm, which swept sections of Louisiana, Texas, Alabama, Mississippi and Tennessee yesterday.

A deluge of rain extended over a more extensive area and practically demolished telegraph and telephone service for several hours. Greatest property damage, and loss of life was reported in Provençal, and in the town of Provençal practically was wiped out. The property damage at Brookeland, Texas, near the Louisiana border, was estimated at \$100,000. While only one person was reported killed at that point, many were seriously injured.

Reports from Gadsden, Ala., told of one death, one person missing and destruction of property in Etowah and Calhoun counties. All wires in the path of the storm in that section were blown down or put out of commission by lightning.

Pleasant Grove, Maury county, Tenn., was struck by the storm and it was thought the death list would amount to four persons at that place. Lexington, Chattanooga and Camden, Tenn., are said to have suffered damage, although no loss of life is reported.

In Mississippi some damage to property was reported at Tunica, Corinth, Sallis and Guntown.

Washington, March 14.—A storm of unusual proportion causing heavy rainfall and snow in practically every section of the country was cen-

tral this morning at Charles City, Ia., where a barometer of 28.86 inches was recorded. Heavy rains continue in the Southern states, the Middle Atlantic states. Weather experts predict unsettled weather in the Atlantic, Great Lakes and Upper Ohio Valley regions for the next two days. Considerable snow has fallen in the Northwest.

Rome, Ga., March 14.—Eighteen persons are reported dead and many more injured as the result of the storm which swept over Georgia last night. Property damage was heavy.

Huntsville, Ala., March 14.—Several persons were reported killed and injured at Madison Cross Roads when last night's cyclone demolished many houses. Wire facilities are interrupted and details are not to be obtained.

Columbus, Ga., March 14.—A storm of cyclonic proportions struck Columbus early today, causing damages estimated at several hundred thousands dollars and two deaths are reported. Buildings of the Phoenix mills and the Swift manufacturing company were partially demolished.

SHOCKS REPORTED BY SEISMOGRAPH

Washington, March 14.—Violent earthquake shocks apparently originating within 100 miles of Washington, were recorded early today on the seismograph at Georgetown University. The vibrations began at 4:04 o'clock and continued until 5:22.

J. P. MORGAN IN ROME. Rome, Italy, March 14.—J. Pierpont Morgan arrived here from Naples yesterday afternoon. He intends to remain in Rome three weeks.

Electrocuted on Public Square. Sidney, March 14.—M. Faulkner, aged 29, was electrocuted on the public square here by a high tension wire.

Olney May Be Envoy to England

It is reported that Richard Olney, secretary of state in Cleveland's administration, has been chosen by President Wilson for the post of ambassador to Great Britain in view of his age—he is seventy-eight—there is some doubt whether Mr. Olney will accept. Mr. Olney will be remembered as the author of the famous Venezuela note.

Francisco I. Madero, Sr.

The photograph shows Francisco I. Madero, Sr., father of the murdered president of Mexico, as he appeared recently in New York City.

BLIZZARD WAS RESPONSIBLE FOR ACCIDENT

Omaha, March 14.—Union Pacific passenger train No. 12, known as the Colorado special, ran into the rear of No. 4, the Atlantic express, at 3 o'clock this morning near Gothenberg, Neb., killing four persons and injuring thirty more, according to advices received here.

The known dead are: Miss Edith Hoon, Cheyenne, Edwin I. Ousterhout, New York. Mr. and Mrs. August Meyer, Denton, Ia.

The passenger train accident was due to the blinding blizzard that has been raging in the west. Train No. 4 was standing at the station when the Colorado train crashed into the rear car. The killed were all in the rear car.

HON. W. A. ASHBROOK TO SPEAK AT THE ARMORY SATURDAY

The old veterans are making extensive preparations to greet their friend, Congressman William A. Ashbrook, at the armory Saturday afternoon at 1:30 o'clock. Mr. Ashbrook is an honorary member of Newark's "Old Guard," and that organization will be in full uniform.

In Thursday's mention of the meeting the invitation to the U. V. L. was not mentioned and that organization is given a special invitation to be present to assist in receiving Licking county's honored citizen who so ably represents the Seventeenth district.

The old soldiers all over the Seventeenth district are up in arms protesting against placing Licking county in an entirely new district as proposed by the Fulton gerrymander. They wish the man who has done so much for them kept in the Seventeenth district as it is now formed and they are protesting vigorously against the proposed abolition of the district.

All comrades, soldier organizations and Sons of Veterans are invited to turn out Saturday afternoon and hear the soldiers' friend in one of his characteristic addresses.

ALL QUIET IN RUBBER FACTORY DISTRICT TODAY

Akron, O., March 14.—All was quiet in the rubber factory district today morning. With all the streets in the vicinity of the big plants patrolled from 7:30 to 7, no attempt was made by strikers to picket the plants or intimidate any of the workers.

I. W. W. leaders have arranged for a meeting at P. K. park this afternoon where William D. Haywood is to deliver an address. Haywood's speech yesterday was in strange contrast to the inflammatory utterances which have characterized his former addresses here and officials say they will not prohibit him as long as he does nothing to incite the strikers to violence.

TWENTY KILLED IN BUENOS AYRES

Buenos Ayres, Argentina, March 14.—Twenty persons were killed or seriously injured by a destructive cyclone here today. A heavy damage loss is reported.

PASS BILL FOR CIVIL SERVICE

Measure Goes Through Senate by a Vote of 26 to 5

SWEEPING IN CHARACTER

And Includes Employees of State, County, City and School Districts—Doings of Legislature.

LEGISLATIVE SUMMARY.

Senate passes civil service bill, affecting state, county, city and school district employees. Discovery made that home servants are not included in woman's nine-hour bill. House favors state publishing court decisions and selling them at nominal profit; also measure to supplement primary system, whereby county committees would fill vacancies. Cox measure to provide data on employment of women in mercantile establishments offered in senate. Stringent health measure given house approval on second reading; gives state board power to remove local officials.

Columbus, O., March 14.—Even the "white wing" must prove conclusively that he is able to wield his broom and push his cart in compliance with a certain fixed standard of efficiency, in order to obtain a job under the proposed civil service bill, which passed the senate yesterday by a vote of 26 to 5.

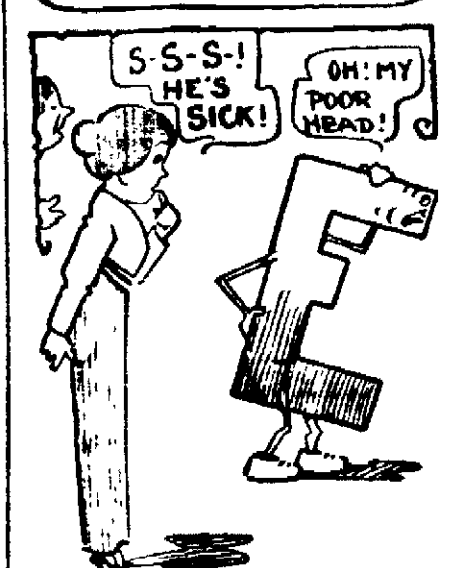

The laborer who wishes to work for the state, city, county or school district is not compelled to answer questions on paper, but he must furnish proof of his ability to labor, his honesty, sobriety, industry, capacity and experience in the work for which he applies.

The act, drafted to fulfill the demands of a constitutional amendment, places all state, county, city and school district employees, other than certain specified ones, under the civil service. They must qualify for position, either by competitive or noncompetitive examination.

Those who are exempted from the operations of the law are, officers elected by popular vote; heads of the principal departments, boards and commissions appointed by the governor, mayor or other appointing authority; officers elected by the general assembly; all election officers, except clerks at main offices of boards; members of the state militia; superintendents, directors and teachers in public schools or colleges; one secretary, chief clerk or assistant to heads of departments; deputies authorized to act for their principals. Those placed under the civil service and required to take examinations for fitness comprise all employees not exempted or those coming within the labor class.

At the head of the system is to be a state civil service commission of three, the members to be appointed by the governor at salaries of \$2,500 a year. The president of the commission may be given an additional \$2,500 if his colleagues feel he is entitled to it. The state commission is to have control of state employees. Its members will hold office for six years. They may employ a chief examiner and fix his salary. The commission must see that all the rules of civil service are enforced. Persons in office at the time the

WHAT IS IT?

What was meaning foolish? Answer to Thursday's puzzle—Park

DEFEAT OF GERRYMANDER PREDICTED BY CHAIRMAN OF SENATE FEDERAL RELATIONS

Washington, March 14.—Assurances that the Fulton gerrymander bill will not pass as introduced beat the text of the measure to Washington. In private letters received here, the Ohio congressmen who are in Washington were informed that the bill was introduced in response to the demand of certain ambitious Democrats, both in and out of the legislature, but there is absolutely no prospect of its enactment of this session. Further than this, it is asserted that it is extremely doubtful whether a bill can be formulated that will satisfy all the interests in the legislature.

Marion, O., March 14.—In the bill to gerrymander the Ohio congressional districts, introduced in the house Saturday by Representative Fulton, chairman of the federal relations committee, puts Marion county into a so-called eighth district with Wyandot, Hancock, Wood, Allen and Hardin counties, a Democratic district, but not nearly so strong a district as the present thirteenth. Senator Finerock predicts that the bill will not pass. The eighth district as outlined in the new bill gave a plurality for Harmon of 6,105 in 1910, all of the coun-

law becomes effective are not required to take competitive examinations, but they must take non-competitive tests to establish their fitness. In cases of suspension a state employee can appeal to state commission, which shall review the charges. If they are not sustained he is reinstated.

Local employees, of course, will appeal to local boards. Local employees now holding places by virtue of examinations are not required to be examined again.

The proposed law changes the method of appointment of municipal civil service commissioners by clothing the mayor with this power. Such commission now are appointed by the president of the council, president of the sinking fund trustees and president of the board of education, acting as a board. Present commissioners will hold office until expiration of the terms. The city commission can make its own rules in compliance with the statute. The mayor has the right to remove members for inefficiency, neglect of duty or malfeasance in office, but copies of the charges must be furnished the accused commissioner and he has a right to defend himself through counsel.

Several attempts were made to amend certain provisions into or out of the bill, but all were failures. Senator Weygant wanted common laborers exempted. Senator Gallagher thought he spied a sleeper injected by a Democrat "higher up" in the provision which exempts incumbents from having to take competitive examination. He wanted those now holding office to take tests also.

Senator Seward wanted police chiefs appointed by the mayor from an eligible classified list, and Senator Fung wanted chiefs of the fire department also included in this arrangement. Senator Lloyd thought school teachers should be placed under civil service and offered an amendment to that effect.

Those who voted against the bill were Beman of Gallia, Broadstone of Green, Gallagher of Madison, Potting of Summit and Seward of Richland.

CLAIM SERBIAN TROOPERS SHOT 300 ALBANIANS

Frankfurt-on-the-Main, Germany, March 14.—Three hundred Albanian inhabitants of Liuma in the Turkish province of Kosovo were shot without trial by the Serbian troops yesterday, according to a dispatch from L'Espresso to the Frankfurt Gazette today. The dispatch read as follows: "The inhabitants of the district of Liuma, 400. They were unarmed peasants and did not follow the example of the rest of the Albanians in fleeing to the mountains. All were captured by a column of Serbian troops, who after shooting 300 of them, brought the rest back to Prizrend, the capital of the province."

London, March 14.—A fierce but unsuccessful assault was made on the south front of the Turkish fortress of Varna last night. According to a dispatch from the city of Constantinople the besieging Bulgarians and Serbians sustained heavy losses and were eventually repulsed all along the line.

Columbus, Ohio, March 14.—Reversing his predecessor, U. G. Denman, Attorney General Hogan yesterday rendered an opinion to the state tax commission that corporations engaged in selling electric current or heat are public utilities and subject to the excise tax on their total gross receipts, whether such receipts are derived from the sale of excess current, or from its other

(ies being in the Democratic column. But this was not a normal vote as in that year Harmon carried the thirteenth district, as now constituted by 12,126, whereas the normal plurality is not more than 5,300. Taking the same ratio in a normal year the proposed eighth would hardly be Democratic. Anderson for congress carried the present thirteenth by about 18,000.

Senator Finerock, interviewed over the telephone, said that he had gone carefully over the new gerrymander bill and that he is strongly opposed to gerrymander the state as proposed by Representative Fulton. Senator Finerock is chairman of the federal relations committee in the senate and this committee will consider the bill if it passes the house.

"I don't approve the manner in which the districts are arranged in the new bill," declared the senator, "and I know that most of the committee members are also strongly opposed."

"You may say for me that I don't believe the proposed bill will pass. There will be a big fight over the way every district is to be changed and the result will be that there will be no gerrymander."

Upper Sandusky, O., March 14.—Dr. O. C. Stutz arrived home Thursday afternoon from his trip to Germany. He is feeling fine and states that the injections given him by Dr. Friedmann have done him much good. He gained 15 pounds in weight and is looking better than he ever did before in his life.

In small vials carefully packed and in a valise that never left his possession, Dr. Stutz brought serum for a limited amount of cases, and serum that he states is the genuine Friedmann serum. Dr. Stutz said "I am the only American physician fully instructed as to its use." He attended the clinics of Dr. Hans Karfunkel and obtained careful and complete instructions.

The doctor was kept busy Thursday afternoon answering letters and telegrams from all parts of the state and from other states, special ones from Cleveland, Albany, Newark, N. J., and one from New Mexico. Patients from all parts want to come here and take the treatment. A limited number will be permitted to come soon for the treatment. Their names will be made public and the progress of the case reported to the public.

WILL RUSH WORK ON THE NEW TEMPLE

As soon as the weather will permit and the building material can be placed, the ground work on the new Masonic Temple will begin. Mr. Hand-shy of Zanesville, the contractor in charge of the construction of the temple, is making every effort to hasten the beginning of the work on the building, and when a start is made it will be pushed to a hasty completion.

The cement foundation was placed last fall, and while the committee in charge of the placing of the contract for the brick to be used has not definitely decided the award, it is probable that it will be announced within the next few days.

WEDS BUT WILL TEACH. Fort Clinton, March 14.—Miss Inez Wenger, one of the teachers of the primary grades here, was married yesterday afternoon to Elmer Brock of Denney. The bride will take a week's vacation and then resume her school work.

BILL TO PROHIBIT FOREIGN BREWERIES

Columbus, March 14.—Aimed at West Virginia brewers, who, being driven out of that state, are said to be preparing to move into Ohio, a bill was introduced in the legislature today providing that there shall not be in any county more than one distillery and brewery for every 10,000 people. However, existing plants were to be excepted that number would not be disturbed by the bill.

Here men, dead or wounded, lay in the sun without attention. Twice during the day General Obregon failed in stubborn attacks on the defenders. At 5:30 last evening the third attempt was made to assault the federal positions. This was more successful, the defenders deserting the right front and extreme left trench and fleeing to the cover of the town. This increased the hot fire on the (Continued on page 17, col. 1.)

SEVERAL AMERICANS WOUNDED

At Nogales, Sonora, in Battle Which Lasted All Day

OVER ONE HUNDRED DEAD

And Twice That Number Wounded—United States Soldiers Rushed to the Boundary.

Nogales, Ariz., March 13.—Colonel Kostelitzky, commanding the federal garrison at Nogales, Sonora, surrendered to General Obregon, the rebel commander, at 6:40 last night, after a terrific battle, which lasted throughout the day.

During the conflict several persons on the American side of the border were wounded.

Casualties in the battle are estimated at 100 dead and twice that many wounded.

Private Allen A. Umfleet, Troop G, Fifth Cavalry, U. S. A., was seriously wounded by a rebel bullet while doing police duty near the international line here. The shot passed through his face from nose to ear. No other Americans were injured.

The United States soldier was shot when the attack was at its height. Lieutenant Colonel Tate, in charge of the Fifth Cavalry patrol, at once sent word to General Obregon, in command of the rebel forces:

"You have shot one of my men. Cease firing, or I shall be after you at once."

At the same moment the firing from the regulars under Generals Kostelitzky and Reyes slackened.

Determined to obtain the remaining Sonora-Arizona port of entry from the federal government, 1000 Constitutionals assaulted the town at daybreak, only to be driven back by the dogged resistance of no more than 250 defenders under Generals Kostelitzky and Reyes.

Troops were rushed here from Fort Huachuca, Ariz., and last night 600 troopers of the Fifth Cavalry were on duty along the border. Despite protests from Lieutenant Colonel Tate and Colonel Smith, many bullets struck on the American side during the day. The renewed attack late in the afternoon increased the danger to residents of the American town.

Three non-combatants were wounded here, while two American women had narrow escapes from injury. While she was sitting on the porch of her home in Nogales, a bullet passed through the skirts of Mrs. H. W. Kelsay and buried itself two inches in his post.

While in her home here, Mrs. Ada M. Gibson was struck in the heel of her shoe by a stray bullet. A small Mexican boy was seriously wounded while on the American side.

Pablo Rubio, former official of Cananea, while sitting in the park here, was slightly wounded in the leg by a stray bullet.

Captain M. Valles of the federals was killed.

Twenty injured men from both sides were brought to hospitals here, but American physicians who braved the firing line reported many more wounded who could not be reached without danger to the rescuers. American residents here yesterday gave their services as Red Cross volunteers.

Nogales is set in an ideal position for defense, between two ranges of hills running parallel north and south. The state troops were compelled to move through this mountainous lane and were mowed down by the fire of the federal rifles and machine guns.

On the plains between the hills the attackers concealed themselves in shallow niches, caused by mountain freshets.

Here men, dead or wounded, lay in the sun without attention. Twice during the day General Obregon failed in stubborn attacks on the defenders.

At 5:30 last evening the third attempt was made to assault the federal positions. This was more successful, the defenders deserting the right front and extreme left trench and fleeing to the cover of the town. This increased the hot fire on the (Continued on page 17, col. 1.)

LANCASTER MEN ELECTROCUTED BY THIRD RAIL

Lancaster, O., March 14.—Dudley Carpenter and David Bobbitt of this city were electrocuted last evening along the Scioto Valley tracks. It is believed the men had a wire attached to the third rail and were trying to electrocute fish in the canal.

Start Your Baby With Sound Health

Regular Bowel Movement from Childhood on Forestalls Future Serious Diseases.

We cannot all start life with the advantages of money, but every child born is entitled to the heritage of good health. Through unfortunate ignorance or carelessness in the feeding of a baby its tiny stomach may become deranged. The disorder spreads to the bowels and before the mother realizes it the two chief organs on which the infant's comfort and health depend are causing it great suffering. If the condition is allowed to continue grave ailments often result.

There is, however, no occasion for alarm, and the only thing to do—but it should be done instantly—is to give the baby a small dose of a mild laxative tonic. In the opinion of a great many people, among them, such well-known persons as the parents of Dixie Dudley, Magnolia, Ark., the proper remedy is Dr. Caldwell's Syrup Pepsin. Mrs. Earl Dudley writes: "Dr. Caldwell's Syrup Pepsin is the best medicine I ever used. It cured my baby of flatulency colic when the doctors failed; it cured my husband of constipation. My home shall never be without Syrup Pepsin." It is a pleasant-tasting laxative, which every person likes. It is mild, non-gripping, and contains that most excellent of all digestants, pepsin.

This remedy is especially intended for infants, children, women, old people and all others to whom harsh cathartics, salt waters, pills, etc., are distressing. In fact, in the common disorders of life, such as con-

DIXIE ASKEW DUDLEY

stipation, liver trouble, indigestion, biliousness, headaches, and the various other disorders of the stomach, liver and bowels nothing is more suitable than this mild laxative-tonic, Dr. Caldwell's Syrup Pepsin.

Two generations of people are using it today, and thousands of families keep it constantly in the house for every member of the family can use it. It can be obtained of any druggist at fifty cents or one dollar a bottle, the latter being the size bought by families who already know its value. Results are always guaranteed or money will be refunded.

If no member of your family has ever used Syrup Pepsin and you would like to make a personal trial of it before buying it in the regular way of a druggist, send your address—a postal will do—to W. B. Caldwell, 417 Washington St., Monticello, Ill., and a free sample bottle will be mailed you.

STOVE THEFT GETS \$10 AND COSTS FOR 2

Best druggist and Henry Deimler, both indicted guilty Friday morning in court to a charge of petty larceny, the allegation being made that the two men stole a stove from a foreign family in South Fifth street several days ago. Grigsby was arrested Thursday afternoon when the victims of the theft cornered him in an alley. Deimler was arrested earlier in the day on a drunk charge. After being locked up, Grigsby implicated Deimler in the theft, claiming that Deimler told him that he had purchased the stove. The prosecuting witness told the police that Grigsby "made love" to her and that her husband wouldn't stand for such "foolishness." The husband kicked her out of the house and because of the husband's kick, she wanted Grigsby arrested. The two defendants were fined \$10 and costs each and ordered committed.

HERE IT IS AT LAST! W. C. Worstell, Principal of Bliss College, has prepared a list of answers to the first forty pictures in the Booklover's Contest. This list will be mailed to any address upon receipt of 25 cent, 14-1-2 South Third street, Newark, Ohio. 14d1

WARDEN ASKED TO SURRENDER PARK LEASE

In a telegram to the Advocate from Hopkinsville, Ky., President Robert W. Read of the Ohio State league says "I have made formal request of Owner Warden to turn over to the league, his lease on the ball park at Newark. The baseball meeting at Chillicothe next Monday will be a final one. Mansfield will be the eighth city in the circuit if Newark is the seventh."

The above message indicates that on the disposition of Newark's case, depends whether Mansfield will be a member of the league. It is probable that Mansfield backers do not care to be included in the circuit if Newark withdraws as the jumps are made long enough by including the two West Virginia cities.

In a telephone conversation this morning, Owner F. G. Warden in Chicago, stated that he would make a proposition through Mr. Weiffenbach, today, which might clarify the situation. Mr. Weiffenbach agreed to report to Newark people by 4 o'clock this afternoon and if the report is satisfactory, C. E. McDaniels will go to Columbus tonight for a conference with the league secretary, Joe Carr.

DON'T NURSE CORNS

TRY THIS REMEDY You can't be disappointed with Putnam's Corn Extractor; it is not only the oldest Corn Doctor, but as thousands know, it is the best. Putnam's Extractor is not a greasy salve that stings all over the foot and inflames it—no, Putnam's is made to go right at corns—to root them out for all time to come. You can remove your corn quickly with a 25c bottle, sold and recommended by druggists and W. A. Erman.

Any Argument For Goodness in Men's Spring SUITS

Is Not Half So Convincing as the Suits Themselves

A spring opening for men must have distinguishing marks of excellence to justify the use of an ad in announcing it. Points of superiority must stand out CLEAR and SHARP. STYLE, QUALITY and PRICE will be the dominating feature of the clothing concerned. Every suit here has passed muster under the critical inspection of men of lifelong experience—experts whose judgment cannot err. We invite comparison, and request analysis of values, for it is only by meeting the most rigid test that we can expect to win continued success.

**FULL OF GINGER,
CHEERFUL, HAPPY**

Chase the Grouch! Clean Your Sluggish Liver and Bowels—Listen to Me.—Feel Dandy.

YOU'LL LOVE "VEGETS."
ONLY A PENNY A DOSE.

"Vegets" will move your bowels and clean your liver so smoothly you won't realize they were acting until morning when all the liver poison, bile, foul gases, indigestible matter and constipated waste gently moves on and out of your 30 feet of bowels.

Take "Vegets" tonight and wake up clear as a bell; no sick headache, sour stomach, gas, indigestion, tainted breath, bad taste, jaundiced eyes, salowness, dizziness, biliousness or constipation.

"Vegets" are tiny, dainty "Inside Cleaners," easy to take, contain no calomel, but made entirely from extracts of vegetables, therefore harmless as food.

Get a small box of "Vegets" from any drug store. They cause no inconvenience, no griping, no distress or annoyance all day like most other laxatives and cathartics.

March 14 In American History.
1863—Admiral Farragut attempted to run past the Confederate batteries at Port Hudson, La., with a Federal squadron; Farragut's flagship, Hartford, and one minor consort got through, but the other vessels were repulsed. The Federal ship Mississippi grounded under fire and was destroyed by her commander.

1894—John T. Ford, well known theatrical manager and owner of the opera house where President Lincoln was assassinated by John Wilkes Booth, died; born 1829.

Society Girl to Wed Inventor's Son

Miss Lilla B. Gilbert is to be one of the spring brides. Mrs. H. Bramhall Gilbert, her mother, recently announced that April 15 had been set for the marriage of Miss Gilbert to Mr. Howard Price Renshaw. The ceremony will take place in Mrs. Gilbert's house in New York City. Mr. Renshaw is the son of Richard Renshaw of Troy, N. Y., a manufacturer and inventor. He is the grandson of the late Commodore Cleverly Price, U. S. N., the late Duchess of Marlborough, formerly Mrs. Lily Hamersley, was his aunt.

"Love knows no law," quoted the Wise Guy. "How about the mother-in-law?" demanded the Simple Mug.

Time works wonders. The young widow is generally older than the old maid.

BEST \$5 HE EVER SPENT

Bristol, Pa., Man Says So in This Letter.

Months of suffering and anxiety over his condition caused Mr. A. L. Kennedy of Bristol, Pa., to write this letter. He says: "Grippe and a bad cough caused me much suffering and worry for five long months, but that is all over now, for I have taken Vinol and am perfectly well. I took five bottles and it was the best five dollars I ever spent."

In health one cannot realize how depressed a person may become after trying one remedy after another for such a condition as Mr. Kennedy was in, without a benefit, or what a relief it is to find help and be restored to health and strength.

It is the combined action of the medicinal curative element of cods' livers, aided by the blood-making and strength-creating properties of tonic iron, that makes Vinol so efficient in overcoming chronic coughs, colds and bronchitis, at the same time building up the weakened run-down system.

We guarantee Vinol to give you perfect satisfaction. Frank D. Hall, Druggist, Newark, O.

P. S. For rough, scaly skin, try our SACK THICK. We guarantee it.

THICK, LUXURIANT HAIR
Obtained by keeping the scalp clean and healthy with Mrs. Mason's Old English Shampoo Cream, 25c a tube, enough for several shampoos.

Daddy's Bedtime Story —

Prank Liked To Get Up At Daylight

Prank Made Frank Get Up Early.

GETTING up in the morning is a worry in most families where there are little girls and boys. Jack and Evelyn were just like others, and their mother often had trouble in making them rise in time for school.

"I wonder if I shall have to get you a squirrel," daddy said laughingly as he heard for the twentieth time how Jack had just jumped out of bed in time to snatch a bite of breakfast, run as hard as he could and still be a minute late for school.

"We would like the squirrel, daddy," the children said. "But how would it help us?"

"I don't know whether it would help you, but it did help little Frankie. Frankie was almost always late in the morning, and when his father brought home a squirrel he had no idea how useful that little animal was going to be.

"Frankie named the squirrel Prank, because it got into so much mischief. The squirrel would run all over the house and pry into every corner. When it wanted to take a nap in the daytime it would crawl under the cushions on the parlor sofa. At night when Frankie went to bed, Prank would crawl under the covers and curl snugly there until daylight.

"But Prank believed daylight was the right time to get up and that every one else ought to get up when he did. He was so lively that Frankie could not get any rest after Prank was out of bed.

"If Frankie did not get up and let him out the squirrel would run chattering over the bed, so that there was no more sleep for the little boy.

"So Frankie gave up and started to get up when Prank did, which was an agreeable change for Frankie's mother and pleased his school-teacher, who had no more black marks for tardiness to put down against his name.

"But one day in the spring Prank went out and never came back. Frankie watched and waited for him for weeks.

"He has gone off to the woods with some other squirrel. I'm afraid we have seen the last of Prank," Frankie's father said.

"But Prank did come back, and they learned what happened to the squirrel.

"Prank had crawled into the window of a neighbor's house and the neighbor's little boy had tried to keep the squirrel in his room.

"However, he soon tired of the squirrel pet, for Prank got up early in the morning and made the little boy do so too. So one day the little fellow had opened his window and Prank had dashed out and made straight for home.

"Frankie was so pleased to see his pet again that he said he would not mind getting up at midnight if he had to do so to satisfy Prank."

WISHES OTHERS TO HAVE RELIEF

Another Lady Tells Public What the United Doctors Have Done For Her.

TREATED ONE MONTH.

Suffered From Stomach and Kidney Trouble for a Period of Five Years.

"I have suffered for five years with pains in my head, back, neck and shoulder blades," said Mrs. Addie Pettit of 713 Broadway street, Martins Ferry, Ohio, in speaking of her condition of health before going to the United Doctors, who have their Newark institute on the second floor of the Arcade building.

"My stomach and kidneys were in bad condition," continued Mrs. Pettit, "and I had constant gas on my stomach, my appetite was poor, and my system run-down in general."

"My experience with one month's treatment with the United Doctors has been of the best. I have no more pains or aches, my appetite is good, I rest fine and I wish others to obtain the same relief I obtained and hence make this statement for publication."

The above statement made recently (March 3d, 1913) tells the oft repeated story of the excellent results constantly being obtained by the United Doctors method of treatment in all chronic ailments or diseases.

Among other ailments the United Doctors treat chronic diseases of the nerves, blood, heart, liver, kidneys, bladder, including rheumatism, paralysis, gall-stones, goitre, indigestion, constipation, rectal troubles, weak lungs, loss of nerve force, dropsy, catarrh, asthma, deafness, and diseases of women and diseases of men.

The United Doctors prepare all of their medicines in their own laboratory for the individual requirements of each patient. Their system of treatment is the "Uniting" of the three principal recognized systems of medicine—Allopathic, Honeopathic and Eclectic, which gives them a much larger field from which to obtain cures than can be obtained by any single school or method of treatment.

STEPHAN'S OLD STAND

Consider Two Men

Mr. A. is \$500 in debt.
Mr. B. has \$500 ahead and deposited in a savings account in this "Old Home" Building Association, earning four per cent interest.

The difference in the lives of these two men—the result of these contrasting conditions, would make a long story.

Many men who have worked for ten years or more are \$500 in debt like Mr. A. Others are merely even, nothing ahead.

And yet, only 25c a day saved and deposited here would amount to \$1,147.00 in ten years—more than the entire difference in the standing of A and B.

A savings account does indeed make a vast difference in one's whole life.

The HOME Building Association Co.
NEWARK, OHIO.

IF YOUR CHILD NEEDS A PHYSIC

If Cross, Feverish, Tongue Coated Give "Syrup of Figs" to Clean the Stomach, Liver and Bowels.

Look at the throat, Mother! If coated, it is a sure sign that your little one's insides, the stomach, liver and 30 feet of bowels are clogged up with purifying waste matter and need a gentle, thorough cleansing at once.

When your child is listless, drooping, pale, doesn't sleep soundly or eat heartily or is cross, irritable, feverish, stomach sour, breath bad, has stomach ache, diarrhoea, sore throat, or is full of cold, give a teaspoonful of Syrup of Figs, and in a few hours all the foul, constipated waste, undigested food and sour bile will gently move on and out of its little bowels without nausea, griping or weakness, and you surely will have a well, happy and smiling child again shortly.

With Syrup of Figs you are not drugging your children, being composed of luscious figs, senna and aromatics it cannot be harmful, besides they dearly love its delicious taste.

Mothers should always keep Syrup of Figs handy. It is the only stomach, liver and bowel cleanser and regulator needed. A little given today will save a sick child tomorrow.

Full directions for children of all ages and for grown ups plainly printed on the package.

Ask your druggist for the full name, "Syrup of Figs and Elixir of Senna," prepared by the California Fig Syrup Co. This is the delicious tasting, genuine old reliable. Refuse anything else offered.

S. E. ALBAN ELECTED MANAGER OF BIG FURNISHING STORE

Mr. S. E. Alban was elected as secretary-treasurer and general manager of the Stewart Brothers & Alward company at the annual meeting of the stockholders held on Friday morning. The meeting of the big house furnishing company was held at ten o'clock in the office of the company, and a very prosperous year was reported. Resolutions were passed on the death of Mr. W. F. Alward, the late general manager of the store and a copy of them was mailed to the family. The business of the election of officers was then taken up and resulted in R. C. Stewart being elected president, P. W. Stewart vice president, S. E. Alban, secretary-treasurer and general manager. Mr. Alban, who succeeds Mr. Alward, has been connected with the firm for the last two years in this city in the capacity of secretary. He came to Newark from Columbus two years ago and then for the first time associated himself with the furniture business. His election to the responsible position of treasurer and manager is well merited reward of his proficiency. The new management announces that the business will be carried on on the same basis as in the past.

The girl who makes hay while the sun shines isn't afraid of freckles.

For Croupy Children Have Musterole at Hand!

When you hear the croup alarm from your child you must have relief at hand—relief prompt and certain. MUSTEROLE positively brings children out of danger, and it does not blister the tenderest skin. Simply rub MUSTEROLE on the chest and throat where the pain is, and the pain is gone! Keep a jar at hand. It is the remedy for adults too. Croup, Sore Throat, Bronchitis, Tonsillitis, Croup, Stiff Neck, Asthma, Neuralgia, Headache, Congestion, Pleurisy, Rheumatism, Lumbago, Pains and Aches of Back or Joints, Sprains, Sore Muscles, Chills, Frosted Feet and Colds of the Chest. (It prevents Pneumonia.)

At your druggists in 25c and 50c jars, and a special large hospital size for \$2.50.

Accept no substitute. If your druggist cannot supply you send 25c or 50c to the Musterole company, Cleveland, Ohio, and we will mail you a jar postage prepaid. Mrs. H. F. Smith, 1234 Broadway, New York City, writes: "I have tried many remedies for my child's croup, but Musterole is the only one that has done so much good as Musterole."

STEFANSSON TO GO FAR NORTH

Will Explore the "Arctic Continent" For British.

WILL BE GONE THREE YEARS

Plans to Carry Elaborate Wireless Apparatus and Moving Picture Machines to Aid in Work—Steam Whaler of 247 Tons to Carry Expedition—Eight Scientists in Party.

New York.—Flying the British flag and not the stars and stripes, as it was his original intention of doing, Vilhjalmur Stefansson, discoverer of the race of blond Eskimos around Coronation gulf, will conduct his second expedition into the arctic this summer. He will go into the great expanse of more than a million square miles of unexplored territory to the north of North America. This will be the first attempt to penetrate these waters from Bering strait since the days of the Jeannette expedition in 1879-81.

Mr. Stefansson's decision to go for the glory of Great Britain followed his communication with various societies inviting them to support him. He received a promise of \$22,500 from the National Geographic society, \$22,500 from the American Museum of Natural History and was awaiting the same.

Photo by American Press Association. VILHJALMUR STEFANSSON.

from the Harvard Travelers' club and the Canadian government when the latter proposed to assume the expense of the entire expedition. Mr. Stefansson communicated with the other societies, and they consented that he make the trip for the Canadian government.

Mr. Stefansson will thus go into the Arctic ocean one year ahead of Captain Roald Amundsen, discoverer of the south pole, and it is believed in many circles that the Norwegian's success had much to do with prompting the Canadian government.

Mr. Stefansson has purchased the steam whaler Karluk, of 247 tons register. The vessel was built in 1884, and her hull is in perfect condition owing to its saturated condition with whale oil. She will be taken to Esquimaux, near Victoria, and from there will begin the voyage next May or early in June. The Karluk will proceed direct through Bering strait, and with Land's End, on Prince Patrick island, as her objective, will put as far into the Arctic ocean as the open water will permit. Mr. Stefansson expects to reach his destination in September and there will make his base. If he is unable to reach as far north by ship he will establish a secondary base at the northwest corner of Wolfen Island or Victoria Island, near his old exploring ground. The ship will be sent back each year, and Mr. Stefansson arranges to be in the arctic until the closing of the summer of 1916.

Wireless apparatus will be taken aboard the Karluk, and stations will be established at Land's End and at the secondary base, through which communication will be established with a station at Herschel Island, near the mouth of the Mackenzie river. In connection with this system the Canadian government will establish a series of stations.

With a land base established Mr. Stefansson will penetrate the unknown region by sledges. Eight scientists will accompany the expedition and full marine meteorological, zoological and other observations will be made. Further study of the Eskimos will be made and moving pictures will be taken of them in all phases of their life.

Bachelor, Ninety, Seeks Wife.
Sioux City, Ia.—Ninety years old and still a bachelor, Olaf Jurgenson of Vail, Ia., has written to Mrs. Cora Swift, probation officer here, to find him a wife.

"I feel young enough to marry," Jurgenson says in his letter. "I have anticipation of living to a ripe old age and want the loving care of a helpmate when my declining years are upon me."

Human Baby Incubator.
Merchantville, N. J.—Joseph Hinchman, a bachelor, now eighty-eight, has raised twenty-six babies from infancy to the age of twenty-one. Salt pork was their chief diet.

There is no such thing as the best half, and yet most people want it.

ORDINANCE NO. 2255

To vacate fifteen feet of the south side of a street in the City of Newark, known as Neal Place.

Be it ordained by the Council of the City of Newark, State of Ohio, that fifteen feet of the south side of Neal Place, a street in said city, thereby narrowing said street to a width of twenty feet, and that such narrowing will not be detrimental to the public interest, it is hereby ordered as follows:

That a certain street in the City of Newark, Ohio, known as Neal Place, and the same is hereby vacated, the width of said street being now twenty feet, and that the width of said street be reduced to fifteen feet.

Commencing at the corner of Union Street and Neal Place, then running south along the east side of Neal Place to the intersection of Neal Place and West Main Street, and thence running south along the east side of West Main Street to the intersection of West Main Street and Granville Street, by paying and curbing the roadway thereof.

That it be the duty of the City Engineer to cause the same to be surveyed and the survey to be filed in the office of the Director of Public Service.

ORDINANCE NO. 2257

To vacate fifteen feet of the south side of a street in the City of Newark, known as Neal Place.

Be it ordained by the Council of the City of Newark, State of Ohio, that fifteen feet of the south side of Neal Place, a street in said city, thereby narrowing said street to a width of twenty feet, and that such narrowing will not be detrimental to the public interest, it is hereby ordered as follows:

That a certain street in the City of Newark, Ohio, known as Neal Place, and the same is hereby vacated, the width of said street being now twenty feet, and that the width of said street be reduced to fifteen feet.

Commencing at the corner of Union Street and Neal Place, then running south along the east side of Neal Place to the intersection of Neal Place and West Main Street, and thence running south along the east side of West Main Street to the intersection of West Main Street and Granville Street, by paying and curbing the roadway thereof.

That it be the duty of the City Engineer to cause the same to be surveyed and the survey to be filed in the office of the Director of Public Service.

ORDINANCE NO. 2258

To vacate fifteen feet of the south side of a street in the City of Newark, known as Neal Place.

Be it ordained by the Council of the City of Newark, State of Ohio, that fifteen feet of the south side of Neal Place, a street in said city, thereby narrowing said street to a width of twenty feet, and that such narrowing will not be detrimental to the public interest, it is hereby ordered as follows:

That a certain street in the City of Newark, Ohio, known as Neal Place, and the same is hereby vacated, the width of said street being now twenty feet, and that the width of said street be reduced to fifteen feet.

Commencing at the corner of Union Street and Neal Place, then running south along the east side of Neal Place to the intersection of Neal Place and West Main Street, and thence running south along the east side of West Main Street to the intersection of West Main Street and Granville Street, by paying and curbing the roadway thereof.

That it be the duty of the City Engineer to cause the same to be surveyed and the survey to be filed in the office of the Director of Public Service.

ORDINANCE NO. 2259

To vacate fifteen feet of the south side of a street in the City of Newark, known as Neal Place.

Be it ordained by the Council of the City of Newark, State of Ohio, that fifteen feet of the south side of Neal Place, a street in said city, thereby narrowing said street to a width of twenty feet, and that such narrowing will not be detrimental to the public interest, it is hereby ordered as follows:

That a certain street in the City of Newark, Ohio, known as Neal Place, and the same is hereby vacated, the width of said street being now twenty feet, and that the width of said street be reduced to fifteen feet.

Commencing at the corner of Union Street and Neal Place, then running south along the east side of Neal Place to the intersection of Neal Place and West Main Street, and thence running south along the east side of West Main Street to the intersection of West Main Street and Granville Street, by paying and curbing the roadway thereof.

That it be the duty of the City Engineer to cause the same to be surveyed and the survey to be filed in the office of the Director of Public Service.

ORDINANCE NO. 2260

To vacate fifteen feet of the south side of a street in the City of Newark, known as Neal Place.

Commencing at the corner of Union Street and Neal Place, then running south along the east side of Neal Place to the intersection of Neal Place and West Main Street, and thence running south along the east side of West Main Street to the intersection of West Main Street and Granville Street, by paying and curbing the roadway thereof.

That it be the duty of the City Engineer to cause the same to be surveyed and the survey to be filed in the office of the Director of Public Service.

mined to proceed with the improvement of Dover Street from Cedar Street to Penn Avenue by paving and curbing the roadway thereof, in accordance with Resolution passed on the 2nd day of December, 1912, in accordance with the plans, specifications, estimates and profiles heretofore approved and now on file in the office of the Director of Public Service.

Section 2. That all claims for damages resulting therefrom shall be judicially inquired into after the conclusion of the proposed improvement.

Section 3. That the whole cost of said improvement, less one-fiftieth thereof, and the cost of intersections, shall be assessed by the foot frontage upon the following described lots and lands, to-wit: All lots and lands bounding and abutting upon the proposed improvement, which said lots and lands are hereby determined to be specially benefited by such improvement, and the cost of said improvement shall include the cost of printing and publishing the notices, resolutions and ordinances required, and the serving of said notices, the costs of construction, together with the interest on bonds issued in anticipation of the collection of deferred payments, and all other necessary expenses, and that the assessment so to be levied shall be paid in ten annual installments, with interest on the deferred payments at 5 percent per annum, provided that the owner of any property assessed may, at his option, pay such assessment in cash within thirty days from and after the passage of the assessing ordinance.

Section 4. That the following lots and lands shall be assessed for said improvement as above determined: All lots and lands bounding and abutting upon the proposed improvement on Dover Street between Cedar Street and Penn Avenue.

Section 5. That the Director of Public Service be and is hereby authorized and directed to make and execute a contract for said improvement with the lowest and best bidder after advertisement according to law.

Section 6. That this ordinance shall take effect and be in force from and after the earliest period allowed by law.

Passed March 3, 1913.
HARRY ROSSSEL,
President of Council.
Attest: HAROLD G. FRANKLIN,
Clerk of Council.

Approved by the Mayor this 13th day of March, 1913.
F. M. SWARTZ,
Mayor.

Section 1. That it is hereby determined to proceed with the improvement of Dover Street from Cedar Street to Penn Avenue by paving and curbing the roadway thereof, in accordance with Resolution passed on the 2nd day of December, 1912, in accordance with the plans, specifications, estimates and profiles heretofore approved and now on file in the office of the Director of Public Service.

OVERWORK AND MENTAL STRAIN

causes run-down health and sickness. Scott's Emulsion and rest are needed, but **SCOTT'S EMULSION** is more important because it enriches the blood, nourishes the nerves—builds the body and restores strength, vigor and immediate energy without interrupting daily duties.

Scott's Emulsion drives out colds and strengthens the lungs.

SCOTT & BOWNE, Bloomfield, N. J.

AMERICANS WOUNDED

(Continued from Page One.)

American side and when a report reached Colonel Tate that one of his troopers had been wounded, he hastily assembled his men.

The American Red Cross workers were refused passage through the federal lines and the American soldiers had difficulty in clearing the streets of spectators.

GENERAL BLISS HAS FULL AUTHORITY.
Washington, March 11.—War de-

partment officials are in close touch with the situation near Nogales, and instructions have been issued to Brigadier General Bliss which give him discretionary authority to deal with the situation in case American lives or property are endangered by border fighting between rebels and federals.

It was stated at the department that the American officers on the border have been charged distinctly to warn the Mexican leaders that they must not seek engagements in places where flying projectiles might find lodgment on the American side of the border. At the same time it is expressly stated to be the depart-

ment's policy to refrain from giving any cause for friction between the two governments.

Assistant Secretary Oliver stated that nothing had yet occurred at Nogales to warrant the department in changing its attitude and that no change in orders had been issued to General Bliss.

The department, has however, announced a general policy under which American soldiers are forbidden to fire across the border or to return the fire of Mexican troops, except upon specific authorization from Washington. But this order, it is not explained, is not meant to in any way restrict the discretionary authority that has been vested in the hands of General Bliss and the other officers along the border.

TABULATING THE BIDS FOR WORK ON IMPROVEMENTS

City Engineer Wells worked all day Thursday and Friday tabulating the bids received on the sewer and street improvements. Wednesday it was doubtful if Friday's labor would finish the work. When the bids are tabulated, the Board of Control, consisting of Mayor Swartz, Service Director McCarthy and Safety Director Collier will meet and award the contracts.

MRS. WRIGHT IS ONLY GLAD TO ADD HER ENDORSEMENT

Vin Hepatica Has Shown Her Road to Health, and She Tells of Results.

Results are the things that count. The age of theory has been relegated to the past and the modern people are more interested in what the thing has done than in what it ought to do. This is the reason why Lieut. Ballard, who is introducing Vin Hepatica, does not take up the public's time with long-winded scientific talks explaining the exact action of Vin Hepatica on the human system. He goes further than this; he actually demonstrates results that have been accomplished by this new formula. He lets citizens of each town read of the experience of somebody living in their midst, who has actually derived benefit from Vin Hepatica. For instance, Mrs. May Wright, 439 Buckeye street, Urbana, O., stated:

"It seems to me as though I have suffered more from my stomach and liver than anyone else living. I have been unable to get relief until I procured a bottle of Vin Hepatica a short time ago. I am now on the road to recovery, thanks to the remarkable merits of this new tissue builder."

"I am only glad to add my endorsement to it."

There is no theory about the good done Mrs. Wright by Vin Hepatica. She is a living testimonial. Health is reflected in her face. It does not matter to her why Vin Hepatica improved her, but the fact that it did is sufficient.

Catarrhal conditions which are treated so successfully by this new formula are recognized by any one of the following symptoms: Dry cough, sick headaches, heavy feeling about the bowels, bad breath, night sweats, impure blood, poor circulation, cold feet, pains in right side and back, or susceptibility to colds.

Vin Hepatica is sold in Newark by T. J. Evans, who is the exclusive agent in this territory and reports splendid sales on this new remedy.

Moose Elect Officers.

Licking lodge, No. 499, L. O. O. M. held its annual election of officers Thursday night, about 700 members being present. The election resulted as follows:

Dictator—George H. Hamilton.
Vice Dictator—David Deming.
Priate—Ira Claggett.
Secretary—R. E. McGonagle.
Treasurer—C. G. Miller.
Inside Guard—Edward Glenn.
Outside Guard—Fred Pfeiffer.
Trustees—Charles Duerr, W. V. Jordan, Lee Riley.

Physicians—Drs. H. H. Baker and P. H. Cosner.
Representative to International convention—J. C. McFarland.

Lots of fellows would be satisfied with any kind of a job they can't get.

ONE DOSE WILL MAKE YOU FORGET

That You Ever Had Stomach Trouble or Gall Stones.

May's Wonderful Stomach Remedy is the best and most widely known remedy for these ailments and should quickly relieve and cure the most chronic cases. Put it to a test. One dose will prove its great curative powers. It acts like magic in the most chronic case of Stomach, Liver and Intestinal ailments, Appetite and symptoms of Gall Stones. Thousands of sufferers are highly praising the remedy and are recommending it to others for restoring them to perfect health. Do not permit a dangerous operation for these ailments until you have at least tried one dose of this great Remedy. Guaranteed by us to be absolutely harmless, containing no injurious drugs, under the Pure Food & Drug Act, Serial No. 2579.

SWITZERLAND IS READY FOR WAR

Little Republic Can Mobilize 100,000 Men in a Day.

FIRST BIG SCARE SINCE 1870

Manning of Troops by France and Germany a Warning to Alpine Ruler Every Man Has Weapon and Uniform at Home and Can Report Promptly at Nearest Barracks.

Geneva.—There is a widespread belief in Switzerland that war between France and Germany is inevitable. On her French and German frontiers Switzerland has seen the gradual concentration of large forces of soldiers during the last two months. The frontier forts, especially Belfort, and those opposite from Mulhouse to Isère are on a war footing.

Since the beginning of the year the Swiss federal authorities have begun to take precautions. All papers have published officially an article stating that in "the event of war" the Swiss in Europe must return to the army at once, while in the second zone of countries, including Austria and other countries where the Swiss are liable to military service, they must hold themselves in readiness to return.

There will be no mobilization in Switzerland, because 100,000 men can

PRESIDENT EDWARD MILLER OF SWITZERLAND.

be at their posts in twenty-four hours, 250,000 men in forty-eight hours and 500,000 within a week.

Every man and officer of the citizen army has a rifle, ammunition, uniform and everything at home and can answer the general roll call at the nearest barracks within a few hours. Briefly, the Swiss army can give its great and powerful neighbors twenty-four hours' start and still be ready before them.

This is the first time since 1870 that the Swiss government has taken matters so seriously. Even the dangerous Agadir incident found it calm and hopeful.

Cereals of all kinds which were ordered in America and Canada, because the usual Russian supply had suddenly failed, owing to the Balkan war, are arriving to fill the almost empty government storehouses.

Farmers have been warned to have their horses in good condition. Chief surgeons and doctors have received official letters from Berne asking them to state whether they would like to follow the ambulance in the field or remain at a base hospital in one of the towns.

HISTORIC TROWEL FOR STATE.

Hammer Also Used at Capitol Cornerstone Laying Given Governor.

Albany.—Governor Sulzer was presented by Colonel and Mrs. Gorham Rice of Albany with the trowel and hammer with which, on July 7, 1899, were laid the cornerstone of the state capitol. Colonel Rice's father, William A. Rice, and Mrs. Rice's father, John V. L. Pruyn, were in charge of the ceremonies and retained possession of the tools.

They were presented to the governor as representing the people of the state, encased in a handsome mahogany box. Upward of \$5,000,000 has been expended on the capitol since 1899.

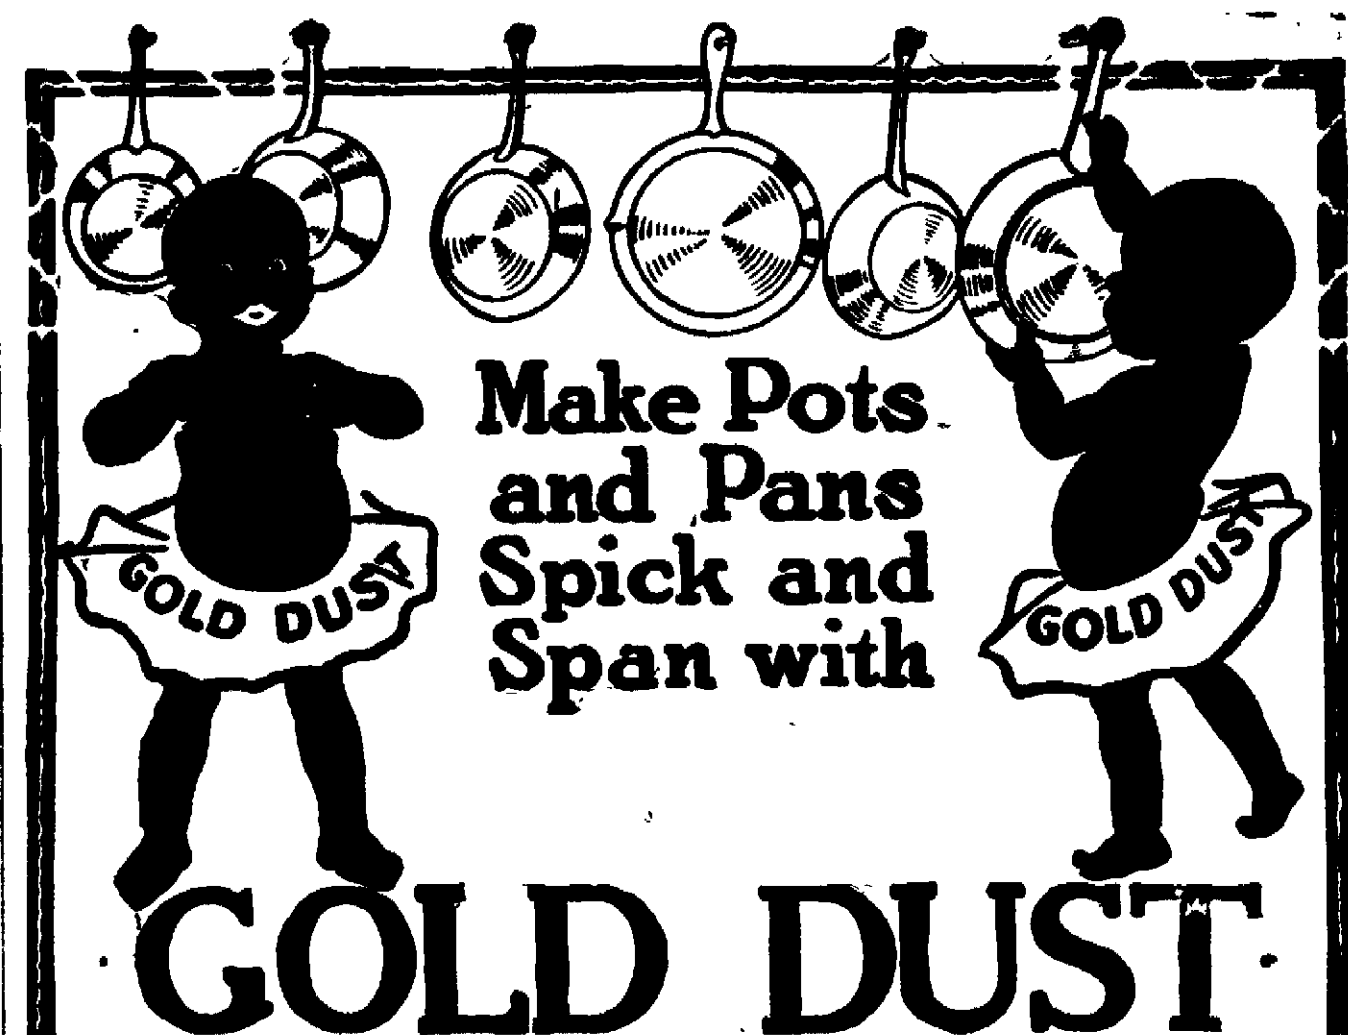

Find \$1,000 Nugget.

Deadwood, S. D.—What is believed to be the richest piece of quartz ever found in the Black Hills has just been taken out of the Summit mine, near Hill City, which for years has been yielding rich finds of gold from seams and streaks.

While working in a drift on the 100-foot level the miners ran across a glittering piece of rock. It weighed four and one-quarter pounds and contained \$1,025 in gold.

This is said to exceed the richness of even the famous chunks taken from the old Hattie, Uncle Sam and other rich mines in the hills.

It sometimes takes a mighty sharp tongue to get a word edgewise

Pots and pans collect more dirt and grease than any other cooking utensil. The one best way of cleaning them is to use Gold Dust. Gold Dust not only takes off the outer dirt coating, but digs deep after germs and hidden particles, and makes them as spotlessly clean and sanitary as when new.

If you want your pots and pans so bright you can see your face in them—your pots and kettles spotless and germ-proof, use Gold Dust in cleaning. It will do the work, too, in half the time of the ordinary cleanser—and save most of your labor. Gold Dust does the bulk of the work alone—you merely assist it.

Gold Dust is sold in 5c and large packages. Buy the large package and practice economy.

You simply cannot keep house properly without Gold Dust.

Made by THE N. K. FAIRBANK COMPANY, Chicago

"Let the GOLD DUST TWINS do your work"

Use Gold Dust for washing clothes and dishes, scrubbing floors, cleaning woodwork, oilcloth, silverware and tinware, polishing brasswork, cleaning bathroom pipes, refrigerators, etc., softening hard water and making the finest soft soap.

RALLY DAY AT BAPTIST CHURCH LAST EVENING

The annual rally day exercises were held at the Baptist church on Thursday evening. The exercises were under the direction of the Baptist Missionary society and a delightful program of speakers and the rendition of vocal and instrumental numbers was given.

Among the speakers was one of especial interest, Mrs. Heinrich, a returned missionary from India. Mrs. Heinrich is the mother of the young student of Denison University who died very suddenly some time ago at the City Hospital as a result of fever. Mrs. Heinrich gave a very interesting talk on her work in the eastern country.

Others on the program were Mr. Williams, a soloist of Granville, and Donald Cross. Following the program a social hour was had and dainty refreshments were served.

Grandmother's Mustard Poultice Beats Most Modern Remedies

Grandma and Mother and Aunt Martha were talking about old-fashioned remedies the other day, but mostly about the mustard plasters, and the plasters they used to banish with their.

Grandma said she used them regularly to do away with aches and pains all over the body, but especially for pleurisy, cold in chest, coughs, sore throat, bronchitis and whenever any one was threatened with pneumonia.

Aunt Martha agreed with grandma that mustard plasters were just what you needed for such things, but said she also used them for rheumatism, lumbago, neuralgia, and other things.

Mother said, of course mustard poultices were good for everything that both grandma and Aunt Martha mentioned, but they were dirty and it stung terribly and took a long time to prepare. So was grandma glad when Mr. Borg of Rochester, N. Y., had invented MUSTARDINE and for the first time so that you could get it in any good drug store, ready to use, and that one box did the work of all the old-fashioned plasters.

Then Grandma and Aunt Martha said they were talking of using it on their backs and kept MUSTARDINE in the house all the time. They said they were glad to find it so easy to use and so effective, and that it was just what they needed for their old-fashioned ailments.

Mr. Borg's grand old MUSTARDINE poultice is made of purest wheat and is so simple to use that it works like magic.

It is so light that it can be used on the face and neck, and it is so strong that it can be used on the most stubborn cases of rheumatism, lumbago, neuralgia, and other things. It is so easy to use that it works like magic.

OBITUARY

MRS. EDWARD COYNE.

Mrs. Catherine Coyne, wife of Edward Coyne, died at her home, 145 1/2 East street, Friday morning at 9 o'clock. The deceased is survived by her husband and five children, three daughters, Mrs. Sadie Walker of Washington, D. C., Mrs. Mary Frost and Mrs. Ella Coyne and two sons, Frank and Ted Coyne.

The funeral services will be held on Sunday afternoon at 2 o'clock at St. Francis church, Rev. Father R. M. G. officiating and burial will be made in Mt. Calvary cemetery.

MRS. CAROLINE ROSEMAN.

Mrs. Caroline Roseman, aged 62 years, died this afternoon at the State hospital, following an illness of several years. She has been a patient at the hospital for several years. Her condition became very serious last Saturday and she died at that time. The deceased was born in Ireland, this county, Feb. 25, 1848, and she lived in this county most of her life. Mrs. Marian Christian of Jackson street is a sister. T. A. Bazler of the firm of Bazler & Bradley, 200 Columbus, to take charge of the body and after preparing for burial, will bring it to Newark. No funeral arrangements have been made.

IMPROVEMENTS AT JOHN H. SWISHER CIGAR FACTORY

Far behind in their orders with more coming in daily, the Jno. H. Swisher & Son cigar factory is making alterations and changes in the interior of their building to double the output of the Newark factory. When

the plans of the company are carried out, the working force will be doubled and the output increased in a like proportion and the management hopes to be able to keep up with the rush of business.

On the second floor, where all the cigars are rolled, changes have been made which will provide room for 150 more cigar makers. The stock room, which formerly occupied a large space in the northeast corner of the room, has been removed to the rear and the stripping machines have been changed to the third floor.

This change doubles the floor space in the room where the manufacturing is done and this room will be filled with tables and occupied by new makers.

With the added facilities the output of the factory will amount to 150,000 cigars per day. This increased production will require additional packing facilities and changes will be made in the packing room to make room for more packing tables. The entire force will number 350 people when the changes are completed.

The working room where the girls are employed, is one of the best lighted and most adequately ventilated of any factory or office in Newark. The gas are lights now in use when artificial light is needed, will be replaced by Turbostem electric. The supply of oxygen, formerly consumed by the gas lights will improve the working conditions in the room.

There are at present 150 girls employed in this room and splendid discipline is maintained. All things considered, the factory is a desirable place for girls seeking employment and no wages are paid to the girls. The company has replaced the steam power for operating the machinery with electric motors.

The Jno. H. Swisher & Son Company operates four factories. One of

Wellston, another at Portsmouth, and another at Ironton. The Newark factory is the smallest in the list.

The company at present has all the business it can handle with the present working force. The greatest problem which confronts the management is the difficulty in obtaining labor. With this question solved, and an ample working force, a vast volume of business can be handled from the Newark factory.

GIVES AWAY \$2.50

WORTH TO THE NERVOUS.

The Widely Known Nerve Specialist, FRANKLIN MILES, M. D., LL.B., Gives His Book and \$2.50 Worth of Neuropathic Treatment Free.

Sick people whose nerves are weak or deranged—who have a weak heart, liver, stomach or bladder; blues, headache, dizziness or vertigo; nervous depression, irritability, cold hands and feet, shortness of breath, palpitation or irregular heart beat, dropsy, drowsiness, nervousness, nervous exhaustion, sleeplessness, trembling, wandering pains, backache, irritable spine, rheumatism, hysteria—would do well to accept Dr. Miles' liberal offer. You may never have another such opportunity.

The Doctor's Special Neuropathic Treatment for this class of diseases is the result of 25 years study and immense experience and is scientific and remarkably successful. It is so successful that it does not operate to offer a trial free to any sick one. Every treatment is specially prepared for each patient and consists of a curative diet, tonic, and a combination of pills and a number of trials have demonstrated that this treatment is three times as successful as that usually prescribed by physicians. Send for Wonderful Cures in Your State.

Mr. G. W. Baker, 121 N. Main St., Washington, D. C., writes after two months' treatment: "Mrs. A. S. Baker, 2910 N. Ave., Chicago, Ill., has been cured of her nervous condition. She was the victim of a nervous condition, starting as a girl, but becoming worse. She will tremble, and has a Free Trial Special Neuropathic Treatment, which has been prepared for you, valuable advice and a book on 'Neuropathic Treatment' to help the nerves." Address Dr. Franklin Miles, 726 Main St., Elkhart, Ind.

Will Issue No More Passes. Newark, March 23.—The Green County Assessor's office has decided to issue no more passes with a pass book, as the passes have not been made a loss of nearly \$1,000, it is said.

TURKS NOW ON VERGE OF DISASTER

Peace Negotiations Probably in Powers' Hands.

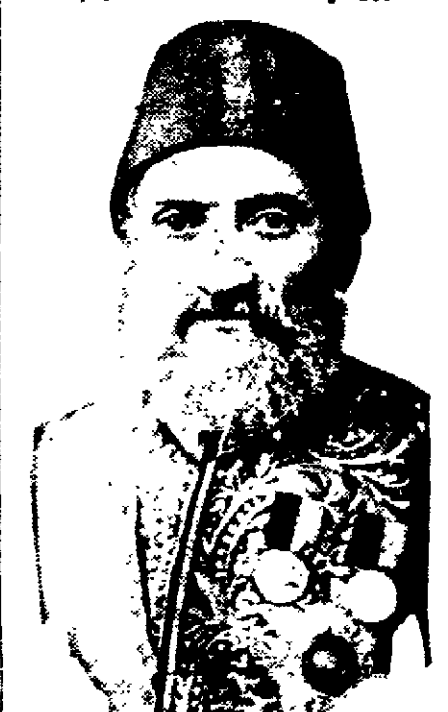

WILLING TO MAKE ANY TERMS

Adrianople and Aegean Islands to Be Signed Away to the Allies—Bulgarians Have Also Made Mistakes, According to Vienna Correspondent. Home Rule Movement Afoot in Syria.

London.—There is confirmation from many important sources of the report that in regard to the peace negotiations Turkey is putting herself in the hands of the powers. So far as is known, the porte has not yet embodied a request of this kind in the form of an official note, but through the ambassadors at the capital the powers have been asked unreservedly for mediation.

A correspondent at Vienna in confirming this statement says the Turks are now decidedly worse off than when Kiamil Pasha, the former grand vizier, accepted the proposals of the powers in regard to the surrender of Adrianople and the submission of the question of the Aegean Islands to the European governments.

This writer says: "The Young Turks, however, accused Kiamil Pasha of treason and foully assassinated their own friend, Nasim Pasha. They declared

KIAMIL PASHA.

that they would cede neither Adrianople nor the islands. Today, however, they are suing abjectly for the intercession of the powers and are offering in return not only Adrianople and the islands, but also independent of the will of the Ottoman state they are undertaking in advance to accept unhesitatingly any terms which Christian Europe thinks fit to make for them.

"No such self abasing decision has ever been taken by a normal nation since the first chapter of European history was written. No wonder the reform party and the Military league are moving heaven and earth to put a speedy and definite end to a regime which has brought the Ottoman empire and the Turkish race to such a hopeless plight."

The writer says he is informed from authorized Turkish sources that the civil administration and the army are honeycombed with conspiracies. The cabinet, which when peace is concluded and Adrianople signed away, if not before, will be swept from the political scene and those responsible for the national disasters will receive condign punishment. Other and more formidable dangers will be created in Syria, where a home rule movement is being started.

This writer is equally severe in his criticisms of the allies, especially Bulgaria, for in a foolhardy way rejecting the advice of the powers, and the Bulgarians, he says, will now have to forego their hopes of dictating terms to the Turks and will have to place themselves in the hands of the powers.

CANNIBALS NEAR BOSTON.

Professor Shiner Finds at Ipswich Relics of a Neolithic Type.

Boston.—Examinations made by Assistant Professor H. W. Shiner of the Institute of Technology of a shell mound at Ipswich led him to believe that the earliest New Englanders, who lived 8,000 to 5,000 and perhaps 10,000 years ago, were cannibals.

Professor Shiner says: "The neolithic type, such as lived in New England, was of a lighter bone structure than the Neanderthal man of Europe and had a greater brain capacity. Our prehistoric type lived here during the bronze age in Europe and central Asia. These Americans were no doubt descendants of the eastern Asia stock. Their bone formation conforms with the bone structure of the early people of that continent."

"Eat Dog Meat," Amundsen. St. Louis.—Captain Roald Amundsen seriously said that Americans can reduce the high cost of living by eating dog meat.

He said he has tried dog meat and has found it good eating, and, besides, it is much cheaper than beef.

Many a man has been pushed to the front through pull.

"The Witching Food" Started 1902—Finished 1912

These bubbles of corn—which we call Corn Puffs—result from ten years of experiment.

They mark the zenith in cereal dainties.

We use in the making just one-fourth of the kernel—just the heart of the corn.

This is granulated, cooked and made into pellets. Then it's toasted and puffed.

The result is these tiny globules—these crisp, airy bubbles—these almond-flavored drops.

With one accord the users of it have called it "The Witching Food." Try it while it's new.

Little Benny's Note Book

There was a karpinter at our house yestiday and he left his hatchitt in a kornir in the setting room, and my cuzin Artie cam eround after supper and we found the hatchitt, beeing a big wun with a red and wite handil, and Artie sed, Lets play Jorge Washintun, no matter wat you chop if you ony tell yure farthir you did it with yure little hatchitt he wont say a werd.

My farthir wood, I sed. No he woodent, eethir, sed Artie if Jorge Washintuns farthir didnt say anything wat rite has yure farthir got to say anything.

Well, I bed he wood, awl rite, I sed.

I bet he woodent, sed Artie, and I sed, wat do you bet, and Artie sed, I bet a sent, and I sed, Awl rite, I bet you, Ill chop the leg of this chare.

Which I startid to do, beeing the leg of the big chare pop, uses to reed in, the hatchitt beeing pritty heavy but sharp awl rite, and pritty soon pop kalled in from his room, Hay thare, hooz that hamminw.

Noboddy, I sed, going awn chopping.

Hooz making that noize then, sed pop.

I am, I sed, without stopping chopping.

Well, wat in the naim of unseamly diskord are you doing, sed pop.

Im chopping, I said, going awn doing it.

Well kut it out, sed pop. Meening to stop it and not meaning to kut it out the way I was kutting it out.

G, you bettir not stop, Artie waped, if you stop he mite say sumthing, you haff to keep it up till he ketches you. So I kepp awn chopping, and pritty soon I herd a noize and wat was it but pop running ovir saying, I thawt I told you to kut it out, well, for the lux of the 40 fuzzy furies, look at my morriss chare.

I kant tell a lie, I did it with my little hatchitt, I sed.

O, you did, you did, did you, sed pop, you klevir little boy, you preekoshis little angil, you.

Yes, sir, I sed, I did it with my little hatchitt.

Ware as I am going to do it with my little slippir, prehaps I kant tell a lie eethir.

Which he did, rite in frunt of Artie, taking him a lawing time, and wen he got awl throo, I sed to Artie, You owe me a sent, enyhow.

I dont kare, it was werth it, sed Artie.

The fellow who asks for a girl's hand should be careful not to put his foot in it.

FOURTEENTH ARTICLE.
COMMERCIAL FER-
TILIZERS.

By EDWARD B. VOORHEES, Late Director
of the New Jersey Agricultural
Experiment Stations.

THERE is perhaps no question of greater importance to the practical farmer than that of soil fertility. To produce profitable crops and at the same time to maintain and even to increase the productive capacity of the soil may rightly be termed "good farming." Many farmers are able to do this, and the knowledge of how to do it has been largely acquired through years of experience, during which the character of the soil, its adaptability for crops and the methods of its management and manuring have been made subjects of careful study, without, however, any definite and accurate knowledge concerning manures and their functions in relation to soils and crops. Experience is an excellent teacher. Still a definite knowledge of the fundamental principles may be substituted for years of experience in the successful use of manures.

The fertility of the soil would remain practically unchanged if all the ingredients removed in the various farm products were restored to the land. This is to a large extent accomplished by feeding the crops grown on the farm to animals, carefully saving the manure and returning it to the soil, and where it is practicable to pursue a system of stock feeding in which those products of the farm which are comparatively poor in fertilizing constituents are exchanged in the market for feeding stuffs of high fertilizing value the loss of soil fertility may be reduced to a minimum, or there may be an actual gain in fertility.

A careful study of the present condition of farming in the United States indicates, however, that as a rule the manure produced on the farm is not sufficient to maintain its fertility and that the need for artificial supplies is real, though the amount required may be considerably reduced by careful management.

In the system of so called "grain farming," which has obtained over large areas of this country for a long time and is still practiced, the live stock is often limited to a number sufficient only to the needs of the farm for labor and food. The grain is sold, and the manure is made up chiefly of the natural wastes or unsalable material, such as straw, stalks, etc. The grain contains proportionately greater amounts of nitrogen and mineral constituents than these wastes. Hence the practice continued for a long time results not only in a deficiency in the soil of organic substances containing nitrogen, but also in an exhaustion of the mineral substances. The original character of the soil and its treatment measure the rate of exhaustion. The less fertile soils of the east and south are rapidly depleted, while the rich prairies and river bottoms maintain their fertility for a longer period.

The continuous cotton and tobacco growing of the south and the wheat growing of the west are even more exhaustive, since here the demands upon the soil are not changed. Year after year the same crop is grown, and the same kind and proportion of constituents are required, while even slighter returns are made in the way of manure than in the system of farming just described. Under such conditions the decomposition of the organic matter in the soil is accompanied by proportionately greater losses of nitrogen. Moreover, the land is left bare for a large part of the year, and its fertility is thereby still further decreased. The crops become less abundant each year, not because the soil is entirely exhausted, but because it is so far exhausted of those constituents essential to the special crop grown that its production is no longer profitable.

Changed conditions of farming, which have an important bearing on this point, are, first, increased cost of labor and lower prices of many of the products of one crop farming, and, second, an increasing demand for market garden products and fruit. For example, in growing wheat, the labor of preparing the soil, of sowing and of harvesting is practically the same, whether the yield is ten bushels per acre or thirty bushels, and the same is true of a number of other crops; hence in case of the larger yield the cost of labor per bushel is materially reduced. Meager crops of a relatively low value cannot be produced profitably with high priced labor. Soils of a high degree of fertility are required in order to produce large yields of these crops. The return to the soil of only the wastes of the farm leads sooner or later to a decreased fertility, however good the management may be; hence the need of supplies of plant food from sources outside the farm in order that maximum crops may be produced.

It has been demonstrated in the case of market garden crops that even very fertile soils contain too little available food to insure a maximum production. This is especially true where rapidity of growth, earliness and high quality

of produce are important factors. The areas now necessarily devoted to these crops are so great that the amount of farm manures available is much too small. Besides, the constituents contained in such manures, being in part but slowly available, are less useful than the more active forms contained in commercial fertilizing materials. Market garden crops are in a sense artificial crops and, as a rule, need artificial supplies of plant food.

Fruit culture, an industry of growing importance, is profitable, particularly on the poorer soils near the eastern markets, largely in proportion to the amounts of the mineral elements applied in excess of those contained in soils otherwise well adapted to the crops. A proper supply of food not only enables the trees to resist unfavorable conditions, but improves the quality of the fruit and prolongs the bearing period of the orchards and vineyards.

It will be thus seen that commercial fertilizers can be used most advantageously either in re-enforcing farm manures in general or in providing a generous supply of quickly available plant food in specialized, intensive farming. It should be the aim in applying such fertilizers to supplement rather than to replace entirely the manurial resources of the farm, for the best results from their application may be secured only on soils well stocked with organic matter humus, a material that can be maintained in the soil only by the systematic application of the bulky barnyard or green manures.

Nitrogen, phosphoric acid and potash are the constituents most likely to be deficient in soils or most quickly exhausted by the production and removal of crops. They are known as "essential" fertilizing constituents, and the value of a commercial fertilizer is determined almost exclusively by the amount and form of the nitrogen, phosphoric acid and potash which it contains. It does not follow, however, that all soils or crops will respond equally to applications of materials containing these elements, for the needs of soils and the requirements of crops vary.

Soils differ as to their needs for specific fertility elements, owing either to their method of formation or to their management and cropping. A sandy soil is usually deficient in all the essential plant food constituents—nitrogen, phosphoric acid and potash—while a clayey soil usually contains the mineral elements in abundance, particularly potash. On the other hand, a soil very rich in vegetable matter is frequently deficient in mineral matter, while a limestone soil is likely to contain considerable proportions of phosphoric acid.

These are the indications in a general way, and they explain why it is that different kinds of soil that have not been cropped differ as to their need of the different fertilizing constituents.

Methods of management and cropping also exert an influence. For example, soils of equal natural fertility may not respond equally to uniform methods of fertilization, because in the one case a single crop requiring for its growth proportionately more of one of the essential elements than of another is grown year after year, and it may be that the element required is the one that exists in the soil in least quantity.

On the other hand, crops may be grown that demand but minimum amounts of the element in question.

Summarizing the conclusions of science and practical experience in regard to the use of commercial fertilizers, it may be said:

First.—Commercial fertilizers are mainly valuable because they furnish the elements—nitrogen, phosphoric acid and potash—which serve as food, not as stimulants.

Second.—The kind of farming in the past and the demands for special products in the present make their use necessary in profitable farming.

Third.—In order to use them profitably the farmer should know—

(a) That nitrogen, phosphoric acid and potash are the essential manurial constituents.

(b) That the agricultural value of these constituents depends largely upon their chemical form.

(c) That these forms are contained in specific products of a well defined character and composition and may be purchased as such from dealers and manufacturers and may be mixed successfully on the farm.

Fourth.—The agricultural value of a fertilizer bears no strict relation to the commercial value. The one is determined by soil, crop and climatic conditions, the other by market and trade conditions only.

Fifth.—The variations in the composition and value of manufactured fertilizers which contain the three essential constituents are due to variations in the character and in the proportion of the materials used.

Sixth.—The ton basis alone is not a safe guide in the purchase of these commercial fertilizers. Low ton prices mean either low content of good forms of plant food or the use of poorer forms. Fertilizers, high grade both in quality and quantity of plant food, cannot be purchased at a low price per ton.

Seventh.—The best fertilizers cannot exert their full effect on soils that are too dry or too wet, too compact or too porous. They can furnish but one of the conditions of fertility.

Eighth.—The kind and amount to use should be determined by the value of the crop grown and its power of acquiring food.

Ninth.—A definite system or plan should be adopted in the use of fertilizers. "Hit or miss" methods are seldom satisfactory and frequently very expensive.

East Side Square Newark Ohio

ARE HOME MIXING FERTILIZERS

In August, 1911, an agricultural extension school was held at Thornville, O. Lectures on soil fertility and the value of home-mixing of fertilizers were given, together with demonstrations of how this work should be done. The aftermath of these lectures is reported in a letter recently received by Professor F. E. Bear, of the College of Agriculture, Ohio State University, from

a man at Thornville, who sells fertilizing material. After the school, in the fall of 1911, he sold thirty tons of material for home-mixing and last fall he sold 165 tons, this increase indicating the attention of farmers of that community are giving to this phase of soil fertility, as a result of the extension school. The man of the year before, who was writing, said: "The farmers had been using something like 1-8-2 and 2-8-2 of fertilizers around here expect to try ready mixed goods, but since home-mixing has been introduced, the

DIPLOMAS GIVEN TO 183 FARMERS

One hundred and eighty-three students received diplomas at the commencement exercises of the winter course in agriculture at Columbus, February 28, upon the completion of the work in the various lines involved in the course. In this number were included three women. The commencement address was delivered by Dr. W. I. Chamberlain,

associate editor of the National Stockman and Farmer, who was Ohio's first secretary of agriculture, and later a member of the Board of Control of the Ohio Experiment Station and the Board of Trustees of the State University. He also achieved considerable fame as the founder of farmers' institute work in the United States.

It cost \$12 a week for a girl to live in Chicago, \$9 in Boston and \$10 in New York.

THE GREAT COUGH-CURE

UTICA WANTS COUNTY FAIR FROM OLD KNOX

Utica people want the Knox county fair held at that place. The agricultural society of the county on the north is in an unsettled frame of mind regarding the location of the fair grounds, having decided to abandon the grounds used for the past fifty years near Mt. Vernon. Fredricktown, a thriving village north of Mt. Vernon, is making a strong bid to locate the fair near that town. Now Utica puts in a bid and says that if there is any objection to holding the exhibition outside of the county, ground can be secured on the northern line of the village which is just inside the boundary of Knox county.

New Bulletin on Potato Growing

By skillful management, potatoes can be grown successfully in nearly every section of Ohio, according to Professor W. J. Green, horticulturist of the Ohio Experiment Station. Professor Green has written a bulletin on potato growing, that is being issued by the College of Agriculture, Ohio State University, as a number of the farmers' reading course. He takes up the subjects of soils best suited to the crop, the best rotations, what fertilizers to use, how to prepare the soil and seed for planting, how to plant, cultivate and spray, and gives a list of varieties best suited to Ohio conditions. Among other interesting information given in this publication is the subject of sun sprouting seed potatoes, in order to secure an especially early crop, or for preserving potatoes for late planting, is explained. By the use of sun sprouted seed Professor Green states that a late variety may be dug within one hundred days from the time of planting. No charge is made for this bulletin and it can be obtained by addressing A. B. Graham, Ohio State University, Columbus, Ohio.

Pimply? Well, Don't Be!

People Notice It—Drive Them Off With Olive Tablets.

A pimply face will not embarrass you much longer if you get a package of Dr. Edwards' Olive Tablets. The pimples will vanish after you have taken the tablets a few nights. Nothing ever cleansed the blood, the bowels and the liver like Olive Tablets.

Olive Tablets are the only successful substitute for calomel—they oil the bowels; there's never any sickness or pain after taking them.

Olive Tablets do all that calomel does and just as effectively, but their action is gentle and safe instead of severe and irritating. No one who takes Olive Tablets is ever cursed with "a dark brown taste," a bad breath, a dull, listless, "no good" feeling, constipation, torpid liver, bad disposition or pimply face.

Olive Tablets are made of pure vegetable compounds mixed with olive oil.

Dr. Edwards spent years among patients afflicted with liver and bowel complaints, and Olive Tablets are the immensely effective result.

Try them. Take one nightly for a week. Then look at yourself in the glass and see how you feel. 10c and 25c per box.

The Olive Tablet Company, Columbus, Ohio.

G. A. R. PROGRAM.

Following is the program for the G. A. R. open meeting to be held Sunday, March 16:

Opening song: "The Battle Cry of Freedom"—By Audience.
Prayer—Chaplain Comrade Barr.
Piano duet—Mrs. Charles Steiner and Miss Anna Reiger.
Declaration—Jen. Greene.
Vocal solo—Miss Bertha Clark.
Address: "The Old Flag"—J. K. T. Ferrell, Department Patriotic Instruction.
Piano and violin duet—Misses Winters and Stasel.
Piano solo—Miss Frances Banton.
Army Reminiscences—Comrade Barch.
Vocal solo—W. Turner.
Army Reminiscences—Richard Conley.
Piano solo—Paul Cosway.
Vocal solo—Frederick Cramer.

MATTY BALDWIN LEADS IN DRAWN FIGHTS.

Matty Baldwin, the clever Boston lightweight, has probably fought more drawn battles than any other boxer. He has held his own with most of the best men of his division, but never seems to be able to put over that "little bit more" that would make him a real championship contender. Three years ago today Matty fought a ten-round draw with Dick Hyland, at Kansas City, and shortly afterward tied with Owen Moran. Before that he had fought draws with Willie Moody, Tommy Murphy, Jim Driscoll, Ad Woleast and Ray Bronson. In 1911 just have of his decision bouts were with Young Saylor, Johnny McCarthy, Frankie Burns and Joe Vando. In that year, by the way, Matty defeated Willie Ritchie in a 20-round affair in San Francisco, and was defeated in the same number of rounds by Freddie Welsh, the English claimant of the world's lightweight title. Last year Matty started out by going to a draw with Jack Redmond in Youngstown, and a little later went to Boston and fought three draws in a row with Eddie Murphy, Tommy O'Keefe and Tommy Ginty. Matty certainly has the draw habit.

Don't spend all your time turning over new leaves.

CHIEF BLIZZARD WANTS MOTOR-BIKE FOR DEPARTMENT

With the coming of the spring weather, there has been a big demand for motor cycle tags at police headquarters. Already, more than sixty tags have been issued this year and this number will be largely increased within the next few weeks. The books of the safety department show that 113 tags were issued last year and it is believed that close to 150 will be issued before the coming summer is over. The fee of \$1 charged for the tag and license card is turned into the safety fund.

Chief of Police Blizzard hopes to interest the safety department to the extent that a machine can be purchased for the department to use in answering to hurry calls from various parts of the city.

With the sum realized from the tags last year, added to what will be received this season, a good machine could be purchased. The upkeep would be a small item and it would add greatly to the efficiency of the department.

THOUSANDS NEED AMBITION PILLS

Banish Nervousness Caused By Too Much Drinking, Smoking or Other Excesses.

Are you a dead one? Have you lost ambition? Do you get up tired in the morning? Do your hands tremble? Are you despondent? Have you lost confidence in your ability to do things?

Don't give up; arouse yourself right now. Go to Evans' Drug Store and get a fifty-cent box of Ambition Pills. You don't have to wait a week to know whether they are doing you good or not. You'll feel better tomorrow. You'll feel full of vim and vigor in three days and after you have taken one box of this marvelous upbuilding prescription you'll be your old vigorous, energetic self again.

For nervous debility, tired feeling, exhausted vitality, hysteria, loss of appetite, kidney and liver complaints they are simply splendid.

FIRST THINGS

The first machine for manufacturing postage stamps was the invention of James P. Bazarus, who was born at Cresskill, N. Y., 113 years ago today. When the British government advertised for a postage stamp machine in 1839 Bazarus was one of 2,500 competitors for the prize, which was awarded to him for his device. Before that he had invented a new kind of clock, a ring-filer for cotton spinning, an eccentric mill, a machine for engraving figures on watch cases and a machine for printing bank notes. In 1847 he constructed in New York, for his own use, a building entirely of cast iron, the first of its kind in America. He completed many other successful inventions and was at work on several ambitious schemes when he died in 1874. The Bazarus postage stamp press was first used in 1840 when penny postage was inaugurated in England, and postage stamps were first used. The system was soon adopted in other countries.

JOHNSON AND JEANETTE FOUGHT SEVEN YEARS AGO

Recent talk of a match between Johnson and Jeanette recalls that today is the seventh anniversary of the only one the seven bouts between the two blacks that was at all decisive. On March 14, 1906, they boxed fifteen rounds in Baltimore, and Johnson won and was clearly

entitled to the decision. Four short bouts in which they engaged showed little to choose between them. Another decision bout was called a draw, and on one occasion Jeanette won on a foul. Since Johnson won the title he has manifested a great deal of anxiety to keep away from Joe, and would much rather fight a white man, instead of a con, con, con.

Captaining Your Soul

WHICH do you believe in," the clubwoman asked her friend, "environment or heredity?" "Neither," was the prompt reply. "I believe in myself."

"Yes," said the other doubtfully, "but don't you believe you inherit certain things? And don't you believe your environment affects you?" "Personally," replied her friend, "I don't believe in heredity; that is, the generally accepted idea of it. I believe we inherit family traditions, and beliefs that affect us—if we let them. But as to actual physical inheritance, I don't believe in it. But for the sake of argument, admitting it is true, what then? Are we slaves? Do we have to wear always certain shackles that may have been placed upon us? Haven't we enough ego, enough individuality, to throw such things off, even admitting they are? To me, it would constitute manhood and womanhood to break such fetters and stand forth free."

"I suppose such a fight would be worth while," said the other woman. "To be sure, it would. It would be a glorious fight. I don't believe we have to make it. I believe we are already free, and that all we have to do, is to look to the path we choose here. But if I believed the other, I would go vigorously to work to break off the fetters."

"And how about environment? Surely that affects one?" "If you let it. What is true of heredity, is true in the same way of environment. If you find your environment is affecting you for the worse, get out of this environment. Or if you can't do this, bend your efforts to improving the environment. And if this is impossible, then build entrenchments about yourself and retreat within them, and don't let a single bit of your environment get within to affect you. I like the stirring line of Henley's poem,

"I am Captain of my soul,
I am Master of my fate."

"Only I like to go a bit farther and say I am Captain under orders from the Supreme Ruler. I fear that if I undertook to guide my little craft altogether by my own knowledge, I would come to grief. But with directions from the One who knows, I am confident. And I do not look behind at heredity, nor about at environment. But with my hand on the wheel, my gaze ahead, and my ear attentive for the still small voice, I journey on, happy in the knowledge that the path into which I will thus be led, cannot but be bright and happy."

"I have a notion to follow your example," said the other woman, a bit wistfully.

"At any rate," rejoined her friend, "don't let your spirit be cowed by the thought of either heredity or environment. You are free, if you will assert your freedom."

Barbara Boyd.

PLAIN GARDEN SAGE DARKENS GREY HAIR AND IS HARMLESS

Says Sage Tea Mixed With Sulphur Restores Natural Color and Lustre.

Gray, faded, dark and thinning hair is a reality to mix with what the rest of the body is doing. You get a large bottle of the "Sage and Sulphur" and Sulphur. Have it mixed with your hair. Millions of bottles of "Sage and Sulphur" are sold annually, because it darkens naturally and evenly. It is a well-known fact that no one can tell it has been applied. It is a well-known fact that no one can tell it has been applied. It is a well-known fact that no one can tell it has been applied.

and draw it through your hair, taking one small strand at a time. Those whose hair is turning gray, becoming faded, dry, severely and thin have a surprise awaiting them, because after just one application the gray hair vanishes and your locks become luxuriantly dark and beautiful. All dandruff goes, scalp itching and falling hair stops. This is the age of youth, gray, faded, unattractive folks aren't wanted around, so get busy with Sage and Sulphur tonight and you'll be young again. Millions of bottles of "Sage and Sulphur" are sold annually, because it darkens naturally and evenly. It is a well-known fact that no one can tell it has been applied. It is a well-known fact that no one can tell it has been applied. It is a well-known fact that no one can tell it has been applied.

"The Kaiser" SILK Glove

The Genuine "KAYSER" Gloves cost no more than the "ordinary kind," don't wear out at the finger "tips," and bear that mark of assurance of quality and reliability—the name "KAYSER."

In manufacturing "KAYSER" Silk Gloves no effort is counted too great to bring about that superlative degree of excellence, which gains recognition upon merit alone.

When offered the "just as good" kind—remember the Cross Roads WARNING—Stop—Look—Listen

Stop—and consider that the "just as good" kind never equals the genuine.

Look—in the hem for the name "KAYSER."

Listen—to the excuses offered for the absence of the maker's name—and insist on seeing the name "KAYSER" in the hem of the silk glove you buy.

A Guarantee Ticket in every pair.

WILSON TO URGE CURRENCY LAWS

But "Tariff First!" Is the Slogan.

MANY DIVERSE VIEWS HELD

Whereas Only Two Sides to Tariff Problem, Currency Question Involves Various Contentions, and Leaders Hesitate to Tackle It—Fitzgerald Had Ill Luck in Seeking Economy.

By ARTHUR W. DUNN.

Washington, March 14.—[Special.]—President Wilson is anxious to have currency legislation considered at the extra session, but will not push it if it interferes with the tariff. "The tariff first of all!" is the slogan of the Democrats, and President Wilson is in line with them. At the same time he will keep watch of things, and if there is a possible way of having currency legislation considered he will urge it in a special message.

One great difficulty about currency legislation is that there are so many diverse views on the subject. The Democrats are pretty well divided on the tariff, but there are only two sides to that question, up and down, so to speak, while there are more angles to the currency problem than can be found in a geometry. There are all kinds of quirks and ideas about the currency, and so many men have different ideas that the leaders in congress will hesitate to tackle the question. Still if the president sends a special message to congress urging action something will have to be done.

"Fitz" and Economy.

Chairman Fitzgerald of the house committee on appropriations started out to give the country an economical administration—to reduce expenditures and cut down appropriations, to carry out the promises made in various Democratic platforms and many Democratic speeches. I am sorry for Fitz. His party ran away with him. It spent more money than any previous congress and constructed two less battleships for the navy.

As a "watchdog" Fitz has been "canned." Congress disregarded him and spent money for such purposes as suited it. But Fitz is not entirely discouraged. He thinks that an income tax will show the country how it has to pay the piper for all these expenditures.

The Difference.

Congressman Garrett of Tennessee explains why congress is extravagant. He says that the man in the state legislature from his district is met by his constituents with glittering eyes when he returns from Nashville, and they ask him, "How much did you spend?" "When I as a congressman return," he says, "I am met by the same constituents, the same glittering eyes, and they ask me, 'How much did you get?' They look upon expenditures from the federal treasury as so much of a federal gift while state expenditures mean actual taxes."

No Real Economist.

In a score of years I have heard much preaching about economy, but I have never known a real economist, one who was willing to sacrifice his own interests, his own state, his own district and his own friends for the benefit of the public good. Hundreds of commissions have been created, junkets innumerable have been organized, offices have been provided, jobs invented—in fact, everything has been done for friends of men in office, for themselves and their relatives. Graft extends to the national capital just as it does to other sections of the country and to municipal affairs.

Recalls a Similar Happening.

It is rather curious that the defeat of Senator Bacon of Georgia for president pro tem. of the senate should be similar to that of the late Senator Hoar of Massachusetts many years ago. Everybody supposed that Hoar was to be selected, but when the Republican caucus was held Manderson of Nebraska was chosen.

It was a surprise and was explained as being due to the admission of several new western states and the fight of the west against the east. But the fact was that Senator Hoar was not popular among his fellow senators, while Manderson had as many friends as there were members of the senate.

Wilson's Influence.

There was little doubt among members of the house in the session just closed but that a letter from Governor Wilson, not then president, stopped the battleship program of those who wanted two ships. This letter was written to Chairman Fitzgerald and was passed around among the Democrats. The two battleship men said that it cost them at least forty votes on the Democratic side.

Out of the Running.

President Wilson's notice to men wanting places in the diplomatic service to see Secretary Bryan first put quite a number out of the running. These were Democrats who did not support Mr. Bryan at different times during his career as a presidential candidate. Bryan has a good memory for names and faces and can recall a Democrat who was not in line in 1896 as well as he can those who have since opposed his plans and his aspirations.

An ad. in the Advocate's Want Columns will bring quick results.

FOR A FIRST CLASS JOB

Give Him Aurora Paint

A practical painter can test the purity of Aurora Paint in the can, by its weight, the appearance of the oil and other little points that he can see. When he dips his brush and gives the first few strokes, he has evidence again by the feel.

AURORA PAINT

spreads evenly and without effort. It has sufficient body to cover well. Being made of pure lead, ground in pure linseed oil, it is wear and weather resisting.

The life of your paint and the life of the linseed oil contained in it are one. By proper blending of certain inert pigments in Aurora Paint, the life of the linseed oil is lengthened, and with it the life of the paint.

Specify Aurora for your next painting job. Put it up to your most practical painter.

SPARTANA.

A modern wonder-worker in the home or office. For refinishing furniture, floors and woodwork. Easily applied by yourself or by your painter

SPARTAN ART WOOD STAINS

FOR INTERIOR FINISHING

Are the highest achievement in wood finishing materials for the practical painter.

HAMILTON MEN OWN LIMA CLUB; MEETING MONDAY.

President Robert Read has called a meeting of the Ohio State League to be held at the Warner House, in Chillicothe, on next Monday. At this time the final circuit will be determined upon and complete arrangements for the coming season will be made.

At present the franchises of Mansfield and Newark are in the hands of the league, owing to the failure of these cities to post their guarantee fund on Wednesday.

Mr. Warden, the former owner at Newark, it is thought, will not continue, but other parties in Newark are negotiating for the franchise. The Mansfield people were holding off on account of their president, Mr. Brown, being in Panama, and

will be represented at the meeting in Chillicothe on Monday. The Lima franchise is owned by Hamilton men and will be transferred to that city.

At the present time there are six clubs with guarantees posted and making preparations to start the season. Mansfield is almost assured and with parties ready to take over the Newark club, the league, in all probability, will start on the opening day, May 8, as an eight-club organization.

BUSINESS MEETING.

The March business meeting of the C. E. Society of the First Presbyterian church will be held in the church parlors Friday evening of this week, promptly at 7 o'clock. Every member urged to come.

New York spends 25 per cent of its tax income in paying interest on its debts. So does Boston.

PUTS AN END TO BACKACHE QUICKLY CURES WEAK KIDNEYS

A Few Doses Give Relief. Helps Lifeless Organs Regain Health, Strength and Activity.

It is needless to say that backache and rheumatism, or suffer with disagreeable kidney and bladder disorders any longer.

The new discovery, Croxone, provides a remedy which every sufferer can now depend upon to promptly and surely remove all such misery and bring about a speedy cure.

Croxone cures these troubles because it quickly overcomes the very cause of the disease. It soaks right into the stunted, up, inactive kidneys, through the membrane and linings; cleans out the little filtering glands; neutralizes and dissolves the poisonous uric acid and makes the kidneys

filter and sift from the blood all the waste and poisonous matter that clog the system and cause such troubles.

It does not matter whether you have but slight symptoms or the most chronic, aggravated case of kidney, bladder, trouble, or rheumatism that it is possible to imagine, for the very principle of Croxone is such that it is practically impossible to take it into the human system without results.

You will find it different from all other remedies. There is nothing else on earth like it. It starts to work the minute you take it and relieves you the first time you use it, and all the misery and suffering that go with such troubles end.

You can secure an original package of Croxone from any first class druggist. All druggists are authorized to personally return the purchase price if it fails to give the desired results the very first time you use it.

FORSAKES TITLE FOR LEPER'S LIFE

Sir George Turner to Devote All His Time to Sufferers.

HOPES TO FIND A REMEDY.

Is Victim of Dread Disease Himself and Thinks There is Great Possibility of Discovering a Cure For It—To Work In South Africa and India—Has Lived In Seclusion at Exeter.

London.—Although Sir George Turner is afflicted with leprosy, a result of his heroic self-sacrifice in working among lepers in South Africa, he has no intention of giving up his active work among the sufferers of this dread disease, but is determined to devote the remainder of his life to the cause.

He has just started his services to the mission to lepers in the east, and it is his hope that there is a better scope for his work in South Africa, where he knows the conditions, and he will go to that land in the hope that he may be able to do something more for his fellow sufferers.

In an interview Sir George said that his treatment of leprosy has not been of the ordinary kind, but that he has found a better way of dealing with the disease, and that he has been able to cure many of his patients. There was a great deal of interest in his treatment, and he thought that some remedy might be found.

"Generally speaking," he said, "people have a very erroneous idea with regard to the contagiousness of leprosy. In my opinion leprosy is usually, if not

LEPER COLONY IN INDIA WHERE SIR GEORGE TURNER WORKED.

always, spread by contagion, but most lepers are not nearly so dangerous to the public as a person suffering from phthisis."

Since the terrible day that he made the dread discovery that he was a victim of leprosy Sir George has lived in comparative retirement near Exeter. He has received numerous invitations to social functions and has invariably replied:

"I will come if you don't mind my being a leper."

FRANCE TO SPEND \$2,000,000.

Wakes Up to the Trade Opportunities in West Indies.

Paris.—The appropriations for improvements in the French West Indies, notably at Pointe à Pitre, Guadeloupe, and Fort de France, Martinique, in anticipation of the opening of the Panama canal, amount to the sum of \$2,000,000. The chamber of deputies having awakened to the fact that France had made no preparation to benefit by that event.

Colonial Minister de Broussard war ministers sent an important mission to the islands last year, and its report and Minister de Broussard's report brought about the present appropriations.

BUREAU TO DRAFT BILLS.

La Follette Wants Its Chief to Be Really Fit.

Washington.—A legislative drafting bureau to draft or revise bills or amendments at the request of any committee or ten members of either house of congress is proposed in a bill introduced by Senator La Follette.

Its chief is to be appointed solely on grounds of fitness and without reference to political affiliations.

"Singing Mice" For Harvard.

Cambridge, Mass.—"Singing mice" are the most recent addition to the collection of rodents under the observation of Charles Coburn of the Harvard psychological department.

The five rodent vocalists, all females, were found by a New Yorker who was attracted to his tool chest by sounds of high chattering that resembled more the notes of canaries than mice.

Pardons Soldier Who Didn't Kneel.

Madrid.—The government has canceled the punishment inflicted on a Protestant soldier for refusing to kneel during a mass at Ferrol and will publish a regulation drawn up in such a manner that a repetition of the incident will be impossible in the future. The soldier had been condemned to six months' imprisonment.

Try Martin's Eye Remedy for Red, Weak, Watery Eyes and Gravelled Eyelids. It Soothing—Just Eye Comfort.

SAHARA AS FACTORY CENTER.

Plan to Use Sun's Heat For Power. Practicable, Says J. Astley Cooper.

London.—Utilization of the Sahara desert as a center of industrial production is the suggestion made by J. Astley Cooper.

It had almost been accepted as a truism, he says, that our coal supplies were giving out, but the Sahara desert received an amount of solar heat every day equivalent to that produced by 100,000,000 tons of coal.

In this arid region, with the great supplies of phosphates available from the western desert, and nearer to the coast and the country traversed by a network of railways, thoughtful engineers say that if some economical method could be found to use this lost solar energy—such, for instance, as the scheme which was on that point, there was no reason why the dreams should not be realized of those who saw great prospects of the world, a new and business in account of the immense heat, given up to the factories of the future. These would be of enormous extent, with glass chambers instead of chimneys and radiators instead of furnaces, all designed to receive and transmit the daily gift of the sun's heat.

WALES A "HOOT MON."

Prince Practices on Bagpipes For Chest Expansion.

London.—The Prince of Wales is ordered to practice the Scotch bagpipes as a means of expanding his chest, which is below the normal for his size and height. The statement that he adopted this weird instrument as a means of expansion was a polite invention.

The captain of the Scots guards' pipers goes to Oxford once a week to give the prince a lesson. Owing to the extraordinary and terrifying noises made by the piper the college authorities are testifying themselves to find a small part of room for the heir apparent to the throne. His lessons behind the whole college.

Certain irresponsible undergrads got up a band of pipers provided with sixty toy pipes, with which they paraded the quadrangle, but they were promptly suppressed.

DIMPLES AT \$26 EACH.

Fashionable London Women Submit to Wounds to Enhance Beauty.

London.—Artificial dimple making is not confined to Paris. Inquiries show that it is being done in London too. A well known "beauty specialist" says fashionable women are now having artificial dimples produced on their faces.

The cost of making permanent dimples ranges from \$25 to \$50. The process usually lasts a fortnight. A small cut is made in the skin. The wound is then bound up and dressed daily until healed. The dimples most in season are little depressions near the corner of the mouth, which show themselves when the owner smiles. It is also possible to produce dimples lasting for a few hours.

WILSON PLANS FOR IMPORTANT TOURS

To Visit Panama and Philippines While President.

Washington.—Washington officials expressed interest in a rumor that originated with persons who have seen Governor Wilson lately that the incoming president has already decided on two, and possibly more trips out of the United States during his administration. These are to the Panama canal and the Philippine Islands.

The president elect is said to have expressed the intention of visiting Panama after the close of the extra session of congress this year to witness the completion and informal opening of the canal.

He also is said to be anxious to make a study of the Philippines at first hand before endeavoring to have congress grant them freedom. This trip would necessarily be put over until after the close of congress in 1914.

He is also understood to be desirous of visiting Alaska some time during his administration.

FIND MASTODON SKELETON.

Quarry Workers Unearth Bones of Forty Feet Animal.

Nashville, Tenn.—Workmen digging a quarry for a new building in a quarry a mile from Nashville discovered the bones of an animal forty feet long. The bones were perfectly preserved, but the other bones were so brittle they crumbled at the touch.

Dr. W. E. Mearns, member of the American Geological Society, visited the place and said the bones were those of a mastodon which probably lived 10,000 years ago. An examination of the bones leads him to believe there is a possibility that the bones will yield other valuable scientific discoveries.

Raises Blue Apples.

Chicago.—A C. W. Wright brought a crate of blue apples to Chicago from his farm near Mountain Grove, Mo. He said he had the hollow of the tree that grew them with concrete. The result was a tree of blue apples, the first of the kind ever raised, according to the owner.

Don't kick every time you have to foot the bill.

CHARMING NEW WAISTS.

VOILE SHIRTS, \$1.25.

Tomorrow We Present Our Spring Stocks At Their Very Best

More Complete, More Beautiful Than Ever—Come In and Pass Judgement.

The wonderful patronage that this store enjoyed during the past season spurred us on to do greater things this Spring, and we have made a good beginning by displaying the largest stocks and most complete assortments of our business career. These two essential features, combined with the exceptionally low prices that are always in vogue here, will make this store more popular than ever before. It is but a little more than a week before another Easter will be upon us, in fact so much earlier this season than usual, that a good many of us are delaying our preparations for correct dress a little too long. Let us suggest that you come in and see our extensive displays of Charming Spring Apparel, either tomorrow or any day next week. If it's a Suit, Coat, Dress, or anything in the ready-to-wear line, you are sure to be pleased here, for our ready-to-wear department is bristling with the season's choicest offerings. A glance at the few items quoted below might offer a valuable solution to the problem of "What to Wear."

NEWARK'S LARGEST GARMENT DISPLAY IS NOW READY

SEEING IS BELIEVING—COME TOMORROW

BEAUTIFUL TAILORED SUITS, \$12.50.

For genuine value you have never seen anything to equal or compare with these wonderful garments. They are tailored from all wool suiting in such popular shades as Tan, Navy, Copen and Black, lined throughout with guaranteed satin. The styles are the best. All sizes from 14 to 44, at each \$12.50.

SUITS AT \$13.00 AND \$17.50.

Pretty tailored effects made up from the most popular and serviceable materials. All the staple and novelty shades included. Linings are of the best satin and Peau de Cygne.

SUITS AT \$20.00 AND \$22.50.

At the above prices you are showing so many charming styles that individual description would be an impossibility. The materials are Bedford Cord, Serges, Diagonals, Eponges, etc.

SPRING COATS, \$8.50.

Pretty Spring Coats, tailored from Serges and Whipcords, in either the 48-in. or full length models. Come in three pretty shades, Tan, Gray and Navy. We would suggest that you see them.

COATS AT \$12.50 AND \$15.00.

These are the two prices that we always feature garments at and this season is no exception. Countless beautiful styles are here to select from that will be hard to duplicate at \$12.50 and \$15.00.

We show for the first time tomorrow the very best styles in midly waists for the coming summer. All of the latest effects will be on display, at each 98c. at \$1.25.

OHIO STATE WON DEBATING CONTEST DEFEATING INDIANA.

Columbus, March 12.—Ohio State University debaters last night defeated the team of the University of Indiana in a hotly contested forensic battle at Bloomington, Ind. The Ohio team defended the negative of the question: "Resolved, That the recall of state judges by popular vote is desirable."

The decision was two to one in favor of the negative. The judges were Ernest Bross, editor of the Indianapolis Star; Demetrius C. Brown, state librarian of Indiana, and Wm. Bates, author, all of Indiana.

Ohio's debaters were Arthur S. Barker, Columbus; Charles Underhill, Columbus; and John Van Dusen, Kirtland. Barker was the only member of the team with previous experience in intercollegiate debating. Members of the Indiana team are said to have been veterans in the game.

AT ONCE! CLOGGED NOSTRILS OPEN

HEAD COLDS AND CATARRH VANISH

Breathe Freely! Clears Stuffed-up, Inflamed Nose and Head and Stops Catarrhal Discharge. Cures Dull Headache.

Try "Ely's Cream Balm." Get a small bottle anyway, just to apply a little to the nostrils and instantly your clogged nose and stopped up air passages of the head will open; you will breathe freely; dullness and headache disappear. By morning the catarrh, cold-in-head or catarrhal sore throat will be gone.

End such misery now! Get the small bottle of "Ely's Cream Balm" at any drug store. This sweet, fragrant balm dissolves by the heat of

the nostrils; penetrates and heals the inflamed, swollen membrane which lines the nose, head and throat; clears the passages; stops nasal discharges and a feeling of cleansing, soothing relief comes immediately.

Don't lie awake tonight struggling for breath, with head stuffed; nostrils closed, hacking and blowing. Catarrh or a cold, with its running nose, foul mucous dropping into the throat, and raw dryness is distressing, but truly needless. Put your faith—just once—in "Ely's Cream Balm" and your cold or catarrh will surely disappear. Hall's Drug Store 10 North Side Square.
